

**DUBLIN SAN RAMON SERVICES DISTRICT
Board of Directors**

NOTICE OF REGULAR MEETING

TIME: 6:00 p.m.
PLACE: Regular Meeting Place
7051 Dublin Boulevard, Dublin, CA

DATE: Tuesday, August 2, 2016

AGENDA

Our mission is to provide reliable and sustainable water and wastewater services to the communities we serve in a safe, efficient and environmentally responsible manner.

BUSINESS:

REFERENCE

<u>Recommended Action</u>	<u>Anticipated Time</u>
---------------------------	-------------------------

1. CALL TO ORDER
2. PLEDGE TO THE FLAG
3. ROLL CALL – Members: Duarte, Halket, Howard, Misheloff, Vonheeder-Leopold
4. SPECIAL ANNOUNCEMENTS/ACTIVITIES
None
5. PUBLIC COMMENT (MEETING OPEN TO THE PUBLIC)

At this time those in the audience are encouraged to address the Board on any item of interest that is within the subject matter jurisdiction of the Board and not already included on tonight’s agenda. Comments should not exceed five minutes. Speakers’ cards are available from the District Secretary and should be completed and returned to the Secretary prior to addressing the Board. The President of the Board will recognize each speaker, at which time the speaker should proceed to the lectern, introduce him/herself, and then proceed with his/her comment.

13. ADJOURNMENT

All materials made available or distributed in open session at Board or Board Committee meetings are public information and are available for inspection at the front desk of the District Office at 7051 Dublin Blvd., Dublin, during business hours, or by calling the District Secretary at (925) 828-0515. A fee may be charged for copies. District facilities and meetings comply with the Americans with Disabilities Act. If special accommodations are needed, please contact the District Secretary as soon as possible, but at least two days prior to the meeting.

**DUBLIN SAN RAMON SERVICES DISTRICT
MINUTES OF A REGULAR MEETING OF THE BOARD OF DIRECTORS**

July 19, 2016

1. CALL TO ORDER

A regular meeting of the Board of Directors was called to order at 6:00 p.m. by President D.L. (Pat) Howard.

2. PLEDGE TO THE FLAG

3. ROLL CALL

Boardmembers present at start of meeting:

President D.L. (Pat) Howard, Vice President Richard M. Halket, Director Edward R. Duarte, Director Madelyne (Maddi) A. Misheloff, and Director Georgan M. Vonheeder-Leopold.

District staff present: Dan McIntyre, General Manager; John Archer, Administrative Services Manager/Treasurer; Dan Lopez, Interim Operations Manager; Judy Zavadil, Acting Engineering Services Manager, Doug Coty, Assistant General Counsel; and Nicole Genzale, Executive Services Supervisor/District Secretary.

4. SPECIAL ANNOUNCEMENTS/ACTIVITIES

New Employee Introductions:

- Dan Pettinichio, Water/Wastewater System Operator IV
- Chuck Simmons, Customer Field Representative II
- Vivian Chiu, Administrative Analyst I
- Judy Zavadil, selected for promotion to Engineering Services Manager

General Manager McIntyre reported that he attended Central Contra Costa Sanitary District's 70th Anniversary celebration last week in Martinez, which hosted over 900 guests. He also announced the District's recycled water system in east Dublin will be out of service for up to 24 hours on Friday July 22 due to necessary development work on Dublin Blvd. Staff is notifying the public of this activity.

5. PUBLIC COMMENT (MEETING OPEN TO THE PUBLIC) – 6:06 p.m.

There was no public comment received.

6. REPORTS

A. Reports by General Manager and Staff

- Event Calendar – General Manager McIntyre reported on the following:

- o The Association of California Water Agencies President Kathy Tiegs will be visiting with Senior Managers tomorrow at 2:30 p.m. at the District Office and Boardmembers are welcome to attend.
 - o Boardmembers Duarte and Vonheeder-Leopold and five staff members will be attending the California Association of Sanitation Agencies annual conference August 10-12 in Monterey. West Yost Associates will be hosting a dinner at the conference. Please contact the General Manager or District Secretary if you would like to attend by close of business this Thursday.
 - o The nomination period for District Boardmember candidates opened July 18 and will close on August 12, 2016.
- Correspondence to and from the Board on an Item not on the Agenda - None
- B. Agenda Management (consider order of items) – General Manager McIntyre reported that Item 11.A will not be needed if Item 8.D is approved.
- C. Joint Powers Authority and Committee Reports
DERWA June 27, 2016

President Howard invited comments on recent DERWA activities. Directors and staff commented on the Recycled Water Treatment Plant Expansion design and construction project that was approved at this meeting.

7. APPROVAL OF MINUTES – Regular Meeting of June 21, 2016

Vice President Halket MOVED for the approval of the June 21, 2016 minutes. Director Vonheeder-Leopold SECONDED the MOTION, which CARRIED with FIVE AYES.

8. CONSENT CALENDAR

Vice President Halket removed Item 8.D for discussion.

Director Duarte MOVED for approval of items 8.A. through 8.C, and 8.E through 8.J on the Consent Calendar. Director Vonheeder-Leopold SECONDED the MOTION, which CARRIED with FIVE AYES.

- A. Intention to Levy Annual Assessments in the Dougherty Valley Standby Charge District 2001-1 for Fiscal Year 2016-2017 – Approved – Resolution No. 42-16
- B. Postpone First Reading of Ordinance Revising District Code Sections 3.60.010, 3.60.020, 3.70.010, and 3.70.080 – Approved
- C. Award Construction Agreement for the Corporation Yard – Materials Bins Installation Project (CIP 16-A005) to C. Overaa & Co. – Approved – Resolution No. 43-16

- D. REMOVED - Appoint Judy A. Zavadil as Engineering Services Manager and Adopt Personal Services Agreement – Approved – Resolution No. 47-16
- E. Adopt Pay Schedule in Accordance with California Code of Regulations, Title 2, Section 570.5, Requirement for a Publicly Available Pay Schedule and Rescind Resolution No. 24-16 – Approved – Resolution No. 44-16
- F. Approve Casting District Vote in the California Special Districts Association (CSDA) 2016 Election for Representative to the Board of Directors for Bay Area Network, Seat B – Approved
- G. Annual Reporting of Expense Reimbursement Over \$100 to Employees and Board of Directors – Approved
- H. Accept the Following Regular and Recurring Reports: District Financial Statements, Warrant List, Upcoming Board Business, Low Income Assistance Program Report, and Outstanding Receivables – Approved
- I. Approve the Transfer of Operating Budget from FYE 2016 to FYE 2017 for Local Wastewater and Regional Wastewater Rate Studies – Approved – Resolution No. 45-16
- J. Approve the Transfer of a Budgeted Capital Outlay Expenditure from FYE 2016 to FYE 2017 for Purchase of a Van – Approved – Resolution No. 46-16

Vice President Halket MOVED to Appoint Judy A. Zavadil as Engineering Services Manager and Adopt Personal Services Agreement. Director Misheloff SECONDED the MOTION, which CARRIED with FIVE AYES.

The Board congratulated Ms. Zavadil on her appointment to the Engineering Services Manager position.

9. BOARD BUSINESS

- A. Reject All Construction Bids for the DSRSD Field Operations Building Project (CIP 16-A005)

Engineering Services Manager Zavadil reviewed the item for the Board. She reported staff will advertise this project again with some adjustments, such as a lower self-perform requirement, in hopes the next bidding process will yield more competitive bids.

The Board and staff further discussed reducing the self-perform requirement in the next bid advertisement to more accurately align with changes in the construction industry. Director Duarte also recommended advertising the project with the Builders Exchange to possibly reach a larger pool of potential bidders. The Board

and staff also acknowledged current challenges to procure contractors due to increased development.

Director Duarte MOVED to adopt Resolution No. 48-16, Rejecting all Bids for Construction of DSRSD Field Operations Building Project (CIP 16-A005). Director Misheloff SECONDED the MOTION, which CARRIED with FIVE AYES.

- B. Approve Process and Schedule of General Manager Performance Evaluation for Period of April 6, 2016 through September 6, 2016

General Manager McIntyre reviewed the item for the Board.

Vice Chair Halket MOVED to Approve Process and Schedule of General Manager Performance Evaluation for Period of April 6, 2016 through September 6, 2016. Director Duarte SECONDED the MOTION, which CARRIED with FIVE AYES.

- C. Review Progress in FYE 2016 on the Strategic Work Plan

General Manager McIntyre reviewed the item for the Board. He gave a presentation highlighting several key work plan items and their current status. He also reported that the many items currently in the plan that are regularly performed business activities, not strategic in nature, will be moved to a separate administrative task list for staff use. Once formulated, this task list will be shared with the Board, but will not require Board approval.

The Board appreciated receiving the status report and commented on various items during Mr. McIntyre's presentation. The Board also concurred that many of the work plan items are prescriptive not strategic, and supported staff's plan to streamline efforts and capture the routine, detailed items within an internal work plan.

10. BOARDMEMBER ITEMS

Director Misheloff submitted a written report to Executive Services Supervisor Genzale. She reported that she attended the Special Districts Leadership Academy held in Napa July 10-13, 2016. She summarized the activities and discussions at the meeting.

Director Duarte reported he attended the Contra Costa Special District's Association meeting at Central Contra Costa Sanitary District in Martinez on July 18, 2016. He summarized the activities and discussions at the meeting.

Director Vonheeder-Leopold submitted a written report to Executive Services Supervisor Genzale. She reported she attended the California Association of Sanitation Agencies Meeting of the Board of Directors teleconference on July 11, the Alameda County Special Districts Association chapter meeting held at the East Bay Municipal Utility District on

July 13, and the Alameda LAFCo meeting held at Dublin San Ramon Services District on July 14, 2016. She summarized the activities and discussions at the meeting.

11. CLOSED SESSION

At 7:03 p.m. the Board went into Closed Session.

A. NOT HELD - Conference with Labor Negotiators – Pursuant to Government Code Section 54957.6

Agency Negotiators: Michelle Gallardo, Human Resources Supervisor

Doug Coty, Assistant General Counsel

Unrepresented Employees: Engineering Services Manager

B. Public Employee Performance Evaluation – Pursuant to Government Code Section 54957

Title: General Manager

12. REPORT FROM CLOSED SESSION

At 7:31 p.m. the Board came out of Closed Session. President Howard announced that there was no reportable action.

13. ADJOURNMENT

President Howard adjourned the meeting at 7:32 p.m.

Submitted by,

Nicole Genzale, CMC
Executive Services Supervisor

Recommendation:

Staff recommends the Board of Directors, by Motion, authorize the General Manager to execute Task Order No. 2 for Professional Records Management Consulting Services with Records Control Services (RCS), in an amount not to exceed \$164,000.59.

Summary:

The Board approved Task Order No. 1 on November 17, 2015 for professional records management consulting services with Records Control Services (RCS). At that time, staff advised that Task Order No. 2 would be forthcoming for Board approval in FY16-17 to ensure continuance of these necessary services. This effort supports District’s Strategic Plan Goal 5.5 - Enhance All District Records Management.

RCS’s attached scope of work consists of 10 phases, to perform inventory, classification, and organization of the Operations Department physical records, as well as ongoing overall program support. Since project inception, RCS completed Phase 1 review of the Laboratory’s records inventory, is near completion of Phase 2 to convert the Laboratory’s filing system, and provided necessary program support and consultation services. RCS also completed inventory, classification, and organization services of the Field Operations Division records, ahead of project formalization and in anticipation of the division’s site relocation.

Background: RCS developed and implemented the District’s physical records management program over 20 years ago and has performed all necessary work to maintain, update, and provide support since the program’s inception. Appropriately, RCS was identified, per the District’s purchasing guidelines, as a sole source vendor for such services. RCS will continue to provide these services in upcoming years, per the Master Agreement for Consulting Services effective through December 2020. This project resulted from the April 2013 District’s Records Management Program needs assessment recommendation to effectively gain control of the District’s proliferating electronic content and physical records. The District requires expert assistance to perform reconciliation of physical records, notably, in the Operations Department, an area of the District that had not been well integrated into the records management program. It is necessary to perform such services in order to more effectively transition the District’s physical records to the Electronic Content Management System (ECMS), OnBase, the future sole repository and administrative system for the District’s records. The Board approved the ECMS project (CIP 15-A006) in May 2014. It is imperative that the District ensure continuity of the program’s current support, maintenance, and assistance in order to accomplish the District’s goals.

The funding for these services was approved and funded 100% in the Two-Year Operating Budget for FYE 2016 & 2017 at the May 5, 2015 Board meeting.

© This proposal was developed for and submitted to Dublin San Ramon Services District, and it contains trademarked and copyrighted proprietary information of Records Control Services, Inc. These proprietary methods and information must not be made available or transferred in any form whatsoever to any person or organization outside of Dublin San Ramon Services District or its agents. By accepting and/or maintaining a copy of this proposal, all parties mentioned above agree to this statement. This proposal supersedes all previous proposals submitted to Dublin San Ramon Services District by Records Control Services, Inc.

Executive Summary

Records Control Services, Inc. (RCS), a firm of information resource management specialists of Danville, California, proposes to provide professional expertise for the Dublin San Ramon Services District (District) by designing and implementing a Records Improvement Program for the Operations Department (Department), Wastewater Treatment Plant divisions to manage, store, track and retrieve active and inactive documents, and to provide ongoing, on-demand program maintenance and professional consulting services to the Executive Management Office.

This proposal is revised as submitted to reflect completed project phases and stages.

Objectives:

Implementation of this program, in total, will provide the District with:

- A complete inventory of designated active records in Department storage areas.
- An accurate, uniform filing index for classifying paper and electronic documents.
- Cost effective equipment and supplies for program management.
- Conversion of Laboratory active files to a uniform, color-coded filing system.
- Designated employees trained in system maintenance and procedures.
- On-demand program maintenance and professional consulting services as needed.

Phases in this proposal include a complete inventory of all active file folders managed in the Department's divisional storage areas, refining the uniform records series index for classifying records, and the physical conversion of designated Laboratory active records into a highly efficient, color-coded filing structure.

To assist in creating, tracking and managing the program, the Electronic Records Management System software used in the District Office records management program will be expanded to include the Department's Wastewater Treatment Plant divisions.

To implement the program as recommended, the District must purchase certain supplies and/or equipment. Estimates for these materials are included for budgeting purposes only. The District will likely receive better pricing on supplies through its approved providers, and RCS will use the District's recycled filing supplies where available.

Phases will be implemented by Task Order to the RCS master service agreement. On-demand maintenance or professional consulting services are provided upon request by the District's Executive Management Office.

Please reference the proposal that follows this section for details on program implementation.

Active Records Inventory & Laboratory Conversion:

RCS Professional Fees and Labor (Remaining):	\$ 83,044.00
Supplies (estimate):	\$ 6,129.39
Equipment (estimate):	\$ 6,441.61
RCS Travel Expenses (estimate):	<u>\$ 3,385.60</u>
Total:	\$ 99,000.59

Professional Fees & Labor include all costs for system development and RCS labor for program implementation. Actual travel expenses for on-demand services are billed based on current IRS mileage allowance rates.

On-demand Program Services:

RCS Professional Fees & Travel Expenses (Remaining): **\$ 65,000.00**

On-demand services are billed in 15-minute minimum increments, with any portion of the increment billed as a whole, at the following rates:

- Program Maintenance Hourly Rate per Person: \$ 150.00
- Professional Consulting Hourly Rate per Person: \$ 180.00

Actual travel expenses for on-demand services are billed at current IRS mileage allowance rates.

Total Project Cost Estimate: \$ 164,000.59

RCS does not sell any supplies, equipment or software and all estimates are based on direct purchase from vendors. Listed items may be purchased through the District's vendors, provided that they are of comparable quality to RCS recommendations.

Implementation may begin at a mutually convenient date, following receipt by RCS of a contract (of which this proposal becomes a part), purchase order, or the signed approval and acceptance of a remittance copy of this proposal.

See Terms and Disclaimer sections within this proposal for additional software, supply and equipment estimate information, and for RCS service and professional fee payment details.

Survey Report and Recommendations

Introduction

At the request of Ms. Nicole Genzale, Executive Services Supervisor/District Secretary, RCS obtained estimated volumes of centralized active records for the Operations Department (Department) divisions at the Wastewater Treatment Plant (Plant) located at 7399 Johnson Drive, Pleasanton.

This report contains the result of the survey, and includes recommendations and proposals for the design and implementation of a Records Improvement Program for managing, storing and retrieving documents, providing the basis for a uniform, legally acceptable Records Management Program.

If implemented in its entirety, this program will integrate designated records into a uniform filing system, and significantly reduce administrative expenses incurred through document management, storage and retrieval.

Implementation may begin at a mutually convenient date, following receipt by RCS of a contract (of which this proposal becomes a part), purchase order, or the signed approval and acceptance of a remittance copy of this proposal.

Purpose

The purpose of the survey was to observe current record handling practices and determine the volume of records kept in decentralized filing equipment within Department divisions at the Plant.

The purpose of this proposal is to provide the Department with records improvement program design and implementation services to allow highly efficient information storage and retrieval.

Scope

Implementation of the program provides records management program design and implementation services for the Laboratory's active records, and a comprehensive file inventory for additional Department divisions, located in filing equipment, drawers, shelving and inactive records boxes within the Plant located at 7399 Johnson Drive in Pleasanton, California.

On-demand program maintenance and professional consulting services are provided as needed for various District projects.

Survey Observations

In November 2014, RCS conducted a walk-through survey of records storage areas within the Department. The results of the survey are summarized below.

Plant Divisions:

Divisions at the Plant, in total, maintain an estimated 8,434 linear filing feet (15,085 linear filing inches) of active and inactive records stored in the decentralized filing areas. This amounts to approximately 23,194 pounds, or 12 tons, of paper.

A majority of the records are not recorded in the Versatile records management software system. This makes determining activity status difficult for the responsible staff members.

A significant amount of this information is inactive or obsolete, and can be disposed out of existing filing equipment.

Plant Laboratory:

The Laboratory maintains an estimated 128 linear filing feet (1,539 linear filing inches) of active records stored in the Laboratory's decentralized filing areas. This amounts to approximately 4,232 pounds, or 2.1 tons, of paper.

These essential records must be efficiently managed and protected, and rapidly accessible to complete business processes within the Laboratory.

Records are housed in pedestal and lateral filing cabinets, wooden drawers, and in boxes and loose volumes within the Laboratory's storage areas. File cabinet drawers hold between 30 and 42 inches of filing capacity, and storage areas hold an average of 14 records per linear filing foot.

Most records are stored in letter-sized manila file folders and loose volumes within drawers.

Where existing, identifying titles are printed on straight-cut end-tab labels, or hand written on the top of the file folders. Inconsistency in label information and location impedes "eyewash" and the ability to rapidly find folders when searching the filing system.

Recommendations

The goal of a comprehensive records management program is to control the creation, acquisition, processing, maintenance, storage and final disposition of all recorded information, regardless of form or media, handled during normal business practices.

To be successful, a comprehensive program should eventually include all offices in the District, and must have the full support of the administrative team as well as that of the District's executive management team and the District Council. Implementation of such a program would result in significant savings for the District through:

- Safe, highly efficient storage and retention of all records in accordance with Federal, State and Local regulations.
- Rapid access to all active, semi-active and inactive records stored in offices or off-site facilities.
- Immediate reduction of misfiled and lost information.
- Cost effective use of prime office and storage space.
- Timely disposal of obsolete records through approved retention schedules.
- Protection of vital records from natural or man-made disasters.

RCS recommends a Records Management Policy be adopted by the Board of Directors to form the foundation of a legally acceptable Records and Information Management (RIM) Program. A full RIM program should be implemented in several segments as follows:

1. Inactive records storage review and inventory.
2. Active files management with a uniform filing system.
3. Records retention management with approved retention periods and schedules.
4. Electronic document management and tracking systems.
5. A Vital Records Protection and Disaster Recovery Program.

Detailed proposals for each segment, as needed, will be submitted upon request of the District.

Approach

The physical record inventory program provides phased, turnkey implementation and integration of designated hardcopy records into a uniform filing system.

All work will be completed by RCS onsite in District offices. RCS staff requires a work area located near the Laboratory's record storage areas, with a work surface and District network access, to complete the data entry and file folder conversion processes.

Assistance is needed from Laboratory staff to review inventory lists, classify records and approve label formats. Staff assistance is minimal and will not significantly disrupt daily activities.

On-demand maintenance or professional consulting services are provided upon request for various projects, as needed by the District's Executive Management Office.

Return on Investment

Based upon industry standards, 3% of all records are misfiled and 7.5% are considered lost. Misfiled and lost records cost \$120 and \$250 respectively to relocate or recreate¹.

Therefore, the District, its agents and contractors incur the following combined annual administrative costs for information management and access:

453 misfiled records @ \$120 each:	\$ 54,306
1,131 lost records @ \$250 each:	\$ 282,843
	\$ 337,149 annually

Implementation of a structured RIM program will virtually eliminate these costs by improving record tracking and retrieval time, and drastically reducing misfiled and lost records. Based on these figures, the District's return on investment for project implementation occurs within 1 year in each department or division.

¹ Figures provided by Coopers & Lybrand, 1999.

Proposal for Records Improvement Program Design, Implementation and Maintenance Services

This proposal presents project tasks and time estimates for the design and implementation of a Records Improvement Program for the Dublin San Ramon Services District (District), Operations Department (Department), Wastewater Treatment Plant (Plant) divisions, and ongoing, on-demand program maintenance and professional consulting services for the Executive Management Office. Implementation of this program, in its entirety, will provide a highly efficient indexing, storage, retrieval and disposition system for designated records.

Phase 1 – Analytical Laboratory Active Records Inventory & Classification

PHASE COMPLETED

Implementation of this phase provides a uniform, functional filing system for decentralized active records within the Plant's Analytical Laboratory (Lab).

Inventory reports help refine the Uniform Functional Filing System™ (UFFS™ Index) created in the District's Administrative Offices to accurately identify record series maintained in the Lab, and allow management to review and designate records for inactive storage or other disposal.

Division Location

WWTP Bldg. A – Operations Building

Phase Tasks

1. Introduce the project to the Lab's management and staff.
2. Designate a Records Coordinator as the Lab's project point person.
3. Review the Laboratory's records inventory in the Versatile Electronic Records Management System (Versatile) and compare to current record holdings.
4. Configure Versatile for data entry and project implementation.
5. Inventory missing records into Versatile.
6. Refine the UFFS™ Index to accurately identify records series within the Lab.
7. Review updated inventory reports with the Records Coordinator and designated staff.
8. Classify records into the UFFS™ Index, refine the index as needed.
9. Designate any inactive records for storage or destruction, as needed.
10. Prepare designated inactive records for storage:
 - a. Create inactive box entries in Versatile.
 - b. Assign box number labels to inactive boxes.
 - c. Associate inventoried inactive records with the assigned box number.
11. Prepare any obsolete records for destruction approvals, as needed.
12. Coordinate workstation installation and access to Versatile with the District's Information Services Department.

RCS will review the Lab's current file inventory listings in Versatile and compare the entries to existing files in active storage areas. Files not entered into Versatile are added based on existing folder label titles.

RCS will then work with the designated Records Coordinator, and Lab staff as needed, to review inventory reports, classify records into the UFFS™ Index, and designate files as active, inactive or obsolete. RCS will refine the UFFS™ Index to accurately list records series (types of records) maintained in the Lab.

Any records designated as inactive are boxed and prepared for storage in the District's Records Center. RCS will create entries for each box in Versatile, assign the file folders to the corresponding box entry, and label boxes for storage.

Any records designated as obsolete are similarly prepared for destruction approval and processing.

Phase Results

Implementation of this phase will provide the Lab with:

- Integration into the Electronic Records Management System for tracking and managing physical records.
- A comprehensive inventory of all active records.
- Inactive and obsolete records processed for storage or destruction, respectively.
- Refining the UFFS™ Index to identify and classify all Lab records.

Phase Duration Estimate

Depending upon Lab staff availability and prior RCS client obligations, this phase can be completed in approximately 7 to 10 weeks after initiation.

Phase 2 – Analytical Laboratory Physical File Conversion

In this phase, labels containing relevant content information, barcodes and color-coded reference tags are printed and placed on side-tab folders in a standard format for ease of viewing. By reducing administrative time to locate folders, color-coding is the most efficient method of filing and retrieving physical documents.

Division Location

WWTP Bldg. A – Operations Building

Phase Tasks

1. Review current supplies and equipment; recommend improvements.
2. Design label format(s); review with the Records Coordinator and approve.
3. Print new color-coded labels on durable, self-adhesive label stock.
4. Convert designated active files into the color-coded filing system.
5. Coordinate equipment installation, as needed.
6. Reorganize files by record series code in new and/or existing equipment.
7. Prepare an Active Records Management Manual with maintenance procedures and label format documents.
8. Train the Records Coordinator and designated staff in program maintenance procedures.

After classification into the UFFS™ Index, RCS will design and print color-coded labels containing information about the file contents. Color-coded label content will depend upon the record classification and may include, but is not limited to, the following formats:

- Project number
- Record series code

Labels are then applied to new end-tab file folders, or to new end-tab expandable pocket folders where needed. RCS may use recycled filing supplies in good condition from the District Office.

Any documents fastened in current file folders will remain in fasteners but will not be physically fastened to the new folder. Documents relocated to expandable pocket folders remain in fasteners but are not physically attached to the pocket folder. Loose papers remain unfastened within the new file or pocket folders.

Any records designated as inactive or obsolete in Phase 1 are not converted to the new color coded system.

Upon completion of the conversion, file folders are organized within new and/or existing open-shelf equipment by record series code, as presented in the UFFS™ Index, and then by label description.

RCS will provide manuals and procedures for program maintenance to the Lab Records Coordinator. The Records Coordinator and selected staff are trained on filing system maintenance.

RCS requires access the Versatile software using secure company laptops, or capable District computers, connected to the District's network, and access to a color laser printer near the workspace for label printing.

Phase Implementation Costs

Professional Fees and Labor (Remaining as of 6/27/16):	\$ 8,844.00
Supplies (estimate):	\$ 4,331.08
Equipment (estimate):	\$ 6,441.61
Travel Expenses (estimate):	\$ 588.80
Total phase costs:	\$ 20,205.49

Fixed cost Professional Fees & Labor listed above include all costs for phase development and RCS labor for program implementation. Invoices for RCS Professional Fees and Labor will be submitted according to the following schedule:

Progress payment 1: **INVOICE PAID, PHASE TASKS 1 THROUGH 3 COMPLETED**

Progress payment 2: \$4,422.00 after completion of Phase Task 4

Progress payment 3: \$4,422.00 after completion of Phase Task 8

See Terms and Disclaimer sections of this proposal for RCS service and professional fee payment details.

To implement the program as recommended in this proposal, the District must purchase certain supplies and equipment. Estimates for these materials are based on retail vendor pricing as of the date of this proposal.

Supplies estimates include:

- Letter-sized end-tab manila file folders without fasteners
- Letter-sized 3.75-inch capacity end-tab pocket folders
- Color-coding labels
- Vinyl out guides
- Miscellaneous conversion supplies
- Tax and shipping estimates

Equipment estimates include:

- Modular, open shelf filing equipment with a capacity of 1,755 linear filing inches.
- Wire desk racks and buckets
- Equipment installation
- Taxes and shipping estimates

RCS does not sell any supplies, equipment or software and all estimates are based on direct purchase from vendors. Listed items may be purchased through the District's vendors, provided that they are of comparable quality to RCS recommendations.

Phase Results

Implementation of this phase, in total, will provide the Lab with:

- A highly efficient system for storing, tracking and managing active records.
- Cost effective equipment and supplies for active filing systems.
- Procedures and manuals for database and program maintenance.
- Management and staff trained in program procedures.

Phase Duration Estimate

Depending upon Lab staff availability and prior RCS client obligations, this phase can be completed in approximately 8 to 10 weeks after initiation.

Phase 3 – Engineering Annex Inventory

Implementation of this phase provides a uniform, functional filing system for decentralized active records within the Engineering Department’s Plant annex (Engineering).

Inventory reports help refine the Uniform Functional Filing System™ (UFFS™ Index) created in the District’s Administrative Offices to accurately identify record series maintained in Engineering, and allow management to review and designate records for inactive storage or other disposal.

Division Location

WWTP Bldg. A – Operations Building

Phase Tasks

1. Introduce the project to Engineering staff.
2. Designate a Records Coordinator as the project point person.
3. Review Engineering’s records in the Versatile Electronic Records Management System (Versatile) and compare to current record holdings.
4. Configure Versatile for data entry and project implementation.
5. Inventory records into Versatile.
6. Refine the UFFS™ Index to accurately identify records series within Engineering.
7. Review inventory reports with the Records Coordinator and designated staff, as needed.
8. Classify records into the UFFS™ Index, refine the index as needed.
9. Designate any inactive records for storage or destruction, as needed.
10. Prepare designated inactive records for storage:
 - a. Create inactive box entries in Versatile.
 - b. Assign box number labels to inactive boxes.
 - c. Associate inventoried inactive records with the assigned box number.
11. Review associated Engineering retention schedules, if any.
12. Prepare any obsolete records for destruction approvals, as needed.

RCS will review Engineering’s current file inventory listings in Versatile and compare the entries to existing files in active storage areas. Files not entered into Versatile are added based on existing folder label titles.

RCS will then work with the designated Records Coordinator, and Engineering staff as needed, to review inventory reports, classify records into the UFFS™ Index, and designate files as active, inactive or obsolete. RCS will refine the UFFS™ Index to accurately list records series (types of records) maintained in Engineering.

Any records designated as inactive are boxed and prepared for storage in the District’s Records Center. RCS will create entries for each box in Versatile, assign the file folders to the corresponding box entry, and label boxes for storage.

Any records designated as obsolete are similarly prepared for destruction approval and processing.

RCS requires access the Versatile software using secure company laptops, or capable District computers, connected to the District’s network. RCS also requires administrator-level access to the database server via Microsoft SQL Server Management to allow data importing and exporting.

Phase Implementation Costs

RCS Professional Fees and Labor:	\$ 7,000.00
Supplies (estimate):	\$ 232.74
RCS Travel Expenses (estimate):	<u>\$ 257.60</u>
Total:	\$ 7,490.34

Fixed cost Professional Fees & Labor listed above include all costs for phase development and RCS labor for program implementation. Invoices for RCS Professional Fees and Labor will be submitted according to the following schedule:

Progress payment 1: \$2,380.00 at phase initiation

Progress payment 2: \$2,310.00 after completion of Phase Task 5

Progress payment 3: \$2,310.00 after completion of Phase Task 12

See Terms and Disclaimer sections of this proposal for RCS service and professional fee payment details.

To implement the program as recommended, the District must purchase certain supplies. Estimates above are based on retail vendor pricing as of the date of this proposal.

Supply estimates include:

- Inactive storage boxes
- Self-adhesive labels
- Taxes and shipping

RCS does not sell any supplies, equipment or software and all estimates are based on direct purchase from vendors. Listed items may be purchased at a discount through the District's vendors, provided that they are of comparable quality to RCS recommendations.

Phase Results

Implementation of this phase will provide Engineering with:

- Integration into the Electronic Records Management System for tracking and managing physical records.
- A comprehensive inventory of all active records.
- Inactive and obsolete records processed for storage or destruction, respectively.
- Refining the UFFS™ Index to identify and classify all Plant Engineering records.

Phase Duration Estimate

Depending upon Engineering staff availability and prior RCS client obligations, this phase can be completed in approximately 5 to 8 weeks after initiation.

Phase 4 – Plant Operations Inventory

Implementation of this phase provides a uniform, functional filing system for decentralized active records within the Operations Department’s Plant Operations division (Plant Operations).

Inventory reports help refine the Uniform Functional Filing System™ (UFFS™ Index) created in the District’s Administrative Offices to accurately identify record series maintained in Plant Operations, and allow management to review and designate records for inactive storage or other disposal.

Division Location

WWTP Bldg. A – Operations Building

Phase Tasks

1. Introduce the project to Plant Operations staff.
2. Designate a Records Coordinator as the project point person.
3. Review Plant Operations’ records in the Versatile Electronic Records Management System (Versatile) and compare to current record holdings.
4. Configure Versatile for data entry and project implementation.
5. Inventory records into Versatile.
6. Refine the UFFS™ Index to accurately identify records series within Plant Operations.
7. Review inventory reports with the Records Coordinator and designated staff, as needed.
8. Classify records into the UFFS™ Index, refine the index as needed.
9. Designate any inactive records for storage or destruction, as needed.
10. Prepare designated inactive records for storage:
 - a. Create inactive box entries in Versatile.
 - b. Assign box number labels to inactive boxes.
 - c. Associate inventoried inactive records with the assigned box number.
11. Review associated Plant Operations retention schedules, if any.
12. Prepare any obsolete records for destruction approvals, as needed.

RCS will review Plant Operations’ current file inventory listings in Versatile and compare the entries to existing files in active storage areas. Files not entered into Versatile are added based on existing folder label titles.

RCS will then work with the designated Records Coordinator, and Plant Operations staff as needed, to review inventory reports, classify records into the UFFS™ Index, and designate files as active, inactive or obsolete. RCS will refine the UFFS™ Index to accurately list records series (types of records) maintained in Plant Operations.

Any records designated as inactive are boxed and prepared for storage in the District’s Records Center. RCS will create entries for each box in Versatile, assign the file folders to the corresponding box entry, and label boxes for storage.

Any records designated as obsolete are similarly prepared for destruction approval and processing.

RCS requires access the Versatile software using secure company laptops, or capable District computers, connected to the District’s network. RCS also requires administrator-level access to the database server via Microsoft SQL Server Management to allow data importing and exporting.

Phase Implementation Costs

RCS Professional Fees and Labor:	\$ 10,500.00
Supplies (estimate):	\$ 70.36
RCS Travel Expenses (estimate):	<u>\$ 404.80</u>
Total:	\$ 10,975.16

Fixed cost Professional Fees & Labor listed above include all costs for phase development and RCS labor for program implementation. Invoices for RCS Professional Fees and Labor will be submitted according to the following schedule:

Progress payment 1: \$3,570.00 at phase initiation

Progress payment 2: \$3,465.00 after completion of Phase Task 5

Progress payment 3: \$3,465.00 after completion of Phase Task 12

See Terms and Disclaimer sections of this proposal for RCS service and professional fee payment details.

To implement the program as recommended, the District must purchase certain supplies. Estimates above are based on retail vendor pricing as of the date of this proposal.

Supply estimates include:

- Inactive storage boxes
- Self-adhesive labels
- Taxes and shipping

RCS does not sell any supplies, equipment or software and all estimates are based on direct purchase from vendors. Listed items may be purchased at a discount through the District's vendors, provided that they are of comparable quality to RCS recommendations.

Phase Results

Implementation of this phase will provide Plant Operations with:

- Integration into the Electronic Records Management System for tracking and managing physical records.
- A comprehensive inventory of all active records.
- Inactive and obsolete records processed for storage or destruction, respectively.
- Refining the UFFS™ Index to identify and classify all Plant Operations records.

Phase Duration Estimate

Depending upon Plant Operations staff availability and prior RCS client obligations, this phase can be completed in approximately 7 to 9 weeks after initiation.

Phase 5 – Industrial Users Inventory

Implementation of this phase provides a uniform, functional filing system for decentralized active records within the Industrial Users division (Industrial Users).

Inventory reports help refine the Uniform Functional Filing System™ (UFFS™ Index) created in the District's Administrative Offices to accurately identify record series maintained in Industrial Users, and allow management to review and designate records for inactive storage or other disposal.

Division Location

WWTP Bldg. A – Operations Building

Phase Tasks

1. Introduce the project to Industrial Users staff.
2. Designate a Records Coordinator as the project point person.
3. Review Industrial Users' records in the Versatile Electronic Records Management System (Versatile) and compare to current record holdings.
4. Configure Versatile for data entry and project implementation.
5. Inventory records into Versatile.
6. Refine the UFFS™ Index to accurately identify records series within Industrial Users.
7. Review inventory reports with the Records Coordinator and designated staff, as needed.
8. Classify records into the UFFS™ Index, refine the index as needed.
9. Designate any inactive records for storage or destruction, as needed.
10. Prepare designated inactive records for storage:
 - a. Create inactive box entries in Versatile.
 - b. Assign box number labels to inactive boxes.
 - c. Associate inventoried inactive records with the assigned box number.
11. Review associated Industrial Users retention schedules, if any.
12. Prepare any obsolete records for destruction approvals, as needed.

RCS will review Industrial Users' current file inventory listings in Versatile and compare the entries to existing files in active storage areas. Files not entered into Versatile are added based on existing folder label titles.

RCS will then work with the designated Records Coordinator, and Industrial Users staff as needed, to review inventory reports, classify records into the UFFS™ Index, and designate files as active, inactive or obsolete. RCS will refine the UFFS™ Index to accurately list records series (types of records) maintained in Industrial Users.

Any records designated as inactive are boxed and prepared for storage in the District's Records Center. RCS will create entries for each box in Versatile, assign the file folders to the corresponding box entry, and label boxes for storage.

Any records designated as obsolete are similarly prepared for destruction approval and processing.

RCS requires access the Versatile software using secure company laptops, or capable District computers, connected to the District's network. RCS also requires administrator-level access to the database server via Microsoft SQL Server Management to allow data importing and exporting.

Phase Implementation Costs

RCS Professional Fees and Labor:	\$ 9,100.00
Supplies (estimate):	\$ 267.92
RCS Travel Expenses (estimate):	<u>\$ 331.20</u>
Total:	\$ 9,699.12

Fixed cost Professional Fees & Labor listed above include all costs for phase development and RCS labor for program implementation. Invoices for RCS Professional Fees and Labor will be submitted according to the following schedule:

Progress payment 1: \$3,094.00 at phase initiation

Progress payment 2: \$3,003.00 after completion of Phase Task 5

Progress payment 3: \$3,003.00 after completion of Phase Task 12

See Terms and Disclaimer sections of this proposal for RCS service and professional fee payment details.

To implement the program as recommended, the District must purchase certain supplies. Estimates above are based on retail vendor pricing as of the date of this proposal.

Supply estimates include:

- Inactive storage boxes
- Self-adhesive labels
- Taxes and shipping

RCS does not sell any supplies, equipment or software and all estimates are based on direct purchase from vendors. Listed items may be purchased at a discount through the District's vendors, provided that they are of comparable quality to RCS recommendations.

Phase Results

Implementation of this phase will provide Industrial Users with:

- Integration into the Electronic Records Management System for tracking and managing physical records.
- A comprehensive inventory of all active records.
- Inactive and obsolete records processed for storage or destruction, respectively.
- Refining the UFFS™ Index to identify and classify all Industrial Users records.

Phase Duration Estimate

Depending upon Industrial Users staff availability and prior RCS client obligations, this phase can be completed in approximately 7 to 10 weeks after initiation.

Phase 6 – Environmental Compliance Inventory

Implementation of this phase provides a uniform, functional filing system for decentralized active records within the Environmental Compliance Division (Environmental Compliance).

Inventory reports help refine the Uniform Functional Filing System™ (UFFS™ Index) created in the District's Administrative Offices to accurately identify record series maintained in Environmental Compliance, and allow management to review and designate records for inactive storage or other disposal.

Division Location

WWTP Bldg. A – Operations Building

Phase Tasks

1. Introduce the project to Environmental Compliance staff.
2. Designate a Records Coordinator as the project point person.
3. Review Environmental Compliance's records in the Versatile Electronic Records Management System (Versatile) and compare to current record holdings.
4. Configure Versatile for data entry and project implementation.
5. Inventory records into Versatile.
6. Refine the UFFS™ Index to accurately identify records series within Environmental Compliance.
7. Review inventory reports with the Records Coordinator and designated staff, as needed.
8. Classify records into the UFFS™ Index, refine the index as needed.
9. Designate any inactive records for storage or destruction, as needed.
10. Prepare designated inactive records for storage:
 - a. Create inactive box entries in Versatile.
 - b. Assign box number labels to inactive boxes.
 - c. Associate inventoried inactive records with the assigned box number.
11. Review associated Environmental Compliance retention schedules, if any.
12. Prepare any obsolete records for destruction approvals, as needed.

RCS will review Environmental Compliance's current file inventory listings in Versatile and compare the entries to existing files in active storage areas. Files not entered into Versatile are added based on existing folder label titles.

RCS will then work with the designated Records Coordinator, and Environmental Compliance staff as needed, to review inventory reports, classify records into the UFFS™ Index, and designate files as active, inactive or obsolete. RCS will refine the UFFS™ Index to accurately list records series (types of records) maintained in Environmental Compliance.

Any records designated as inactive are boxed and prepared for storage in the District's Records Center. RCS will create entries for each box in Versatile, assign the file folders to the corresponding box entry, and label boxes for storage.

Any records designated as obsolete are similarly prepared for destruction approval and processing.

RCS requires access the Versatile software using secure company laptops, or capable District computers, connected to the District's network. RCS also requires administrator-level access to the database server via Microsoft SQL Server Management to allow data importing and exporting.

Phase Implementation Costs

RCS Professional Fees and Labor:	\$ 8,400.00
Supplies (estimate):	\$ 62.24
RCS Travel Expenses (estimate):	\$ 404.80
Total:	\$ 8,867.04

Fixed cost Professional Fees & Labor listed above include all costs for phase development and RCS labor for program implementation. Invoices for RCS Professional Fees and Labor will be submitted according to the following schedule:

- Progress payment 1: \$2,856.00 at phase initiation
- Progress payment 2: \$2,772.00 after completion of Phase Task 5
- Progress payment 3: \$2,772.00 after completion of Phase Task 12

See Terms and Disclaimer sections of this proposal for RCS service and professional fee payment details.

To implement the program as recommended, the District must purchase certain supplies. Estimates above are based on retail vendor pricing as of the date of this proposal.

Supply estimates include:

- Inactive storage boxes
- Self-adhesive labels
- Taxes and shipping

RCS does not sell any supplies, equipment or software and all estimates are based on direct purchase from vendors. Listed items may be purchased at a discount through the District's vendors, provided that they are of comparable quality to RCS recommendations.

Phase Results

Implementation of this phase will provide Environmental Compliance with:

- Integration into the Electronic Records Management System for tracking and managing physical records.
- A comprehensive inventory of all active records.
- Inactive and obsolete records processed for storage or destruction, respectively.
- Refining the UFFS™ Index to identify and classify all Environmental Compliance records.

Phase Duration Estimate

Depending upon Environmental Compliance staff availability and prior RCS client obligations, this phase can be completed in approximately 6 to 9 weeks after initiation.

Phase 7 – Switch Room / Library / Covello Inactive Inventory

Implementation of this phase provides a uniform, functional filing system for decentralized active records within the Switch Room Area (Switch Room).

Inventory reports help refine the Uniform Functional Filing System™ (UFFS™ Index) created in the District's Administrative Offices to accurately identify record series maintained in the Switch Room, and allow management to review and designate records for inactive storage or other disposal.

Division Location

WWTP Bldg. D – MCC D

Phase Tasks

1. Designate a Records Coordinator as the project point person.
2. Review the Switch Room records in the Versatile Electronic Records Management System (Versatile) and compare to current record holdings.
3. Configure Versatile for data entry and project implementation.
4. Inventory records into Versatile.
5. Refine the UFFS™ Index to accurately identify records series within the Switch Room.
6. Review inventory reports with the Records Coordinator and designated staff, as needed.
7. Classify records into the UFFS™ Index, refine the index as needed.
8. Designate any inactive records for storage or destruction, as needed.
9. Prepare designated inactive records for storage:
 - a. Create inactive box entries in Versatile.
 - b. Assign box number labels to inactive boxes.
 - c. Associate inventoried inactive records with the assigned box number.
10. Review associated Switch Room retention schedules, if any.
11. Prepare any obsolete records for destruction approvals, as needed.

RCS will review the Switch Room's current file inventory listings in Versatile and compare the entries to existing files in active storage areas. Files not entered into Versatile are added based on existing folder label titles.

RCS will then work with the designated Records Coordinator to review inventory reports, classify records into the UFFS™ Index, and designate files as active, inactive or obsolete. RCS will refine the UFFS™ Index to accurately list records series (types of records) maintained in the Switch Room.

Any records designated as inactive are boxed and prepared for storage in the District's Records Center. RCS will create entries for each box in Versatile, assign the file folders to the corresponding box entry, and label boxes for storage.

Any records designated as obsolete are similarly prepared for destruction approval and processing.

RCS requires access the Versatile software using secure company laptops, or capable District computers, connected to the District's network. RCS also requires administrator-level access to the database server via Microsoft SQL Server Management to allow data importing and exporting.

Phase Implementation Costs

RCS Professional Fees and Labor:	\$ 12,600.00
Supplies (estimate):	\$ 355.87
RCS Travel Expenses (estimate):	<u>\$ 441.60</u>
Total:	\$ 13,397.47

Fixed cost Professional Fees & Labor listed above include all costs for phase development and RCS labor for program implementation. Invoices for RCS Professional Fees and Labor will be submitted according to the following schedule:

Progress payment 1: \$4,284.00 at phase initiation

Progress payment 2: \$4,158.00 after completion of Phase Task 4

Progress payment 3: \$4,158.00 after completion of Phase Task 11

See Terms and Disclaimer sections of this proposal for RCS service and professional fee payment details.

To implement the program as recommended, the District must purchase certain supplies. Estimates above are based on retail vendor pricing as of the date of this proposal.

Supply estimates include:

- Inactive storage boxes
- Self-adhesive labels
- Taxes and shipping

RCS does not sell any supplies, equipment or software and all estimates are based on direct purchase from vendors. Listed items may be purchased at a discount through the District's vendors, provided that they are of comparable quality to RCS recommendations.

Phase Results

Implementation of this phase will provide the Switch Room Area with:

- Integration into the Electronic Records Management System for tracking and managing physical records.
- A comprehensive inventory of all active records.
- Inactive and obsolete records processed for storage or destruction, respectively.
- Refining the UFFS™ Index to identify and classify all Switch Room Area records.

Phase Duration Estimate

Depending upon the Switch Room staff availability and prior RCS client obligations, this phase can be completed in approximately 9 to 12 weeks after initiation.

Phase 8 – Maintenance & Safety Inventory

Implementation of this phase provides a uniform, functional filing system for decentralized active records within the Maintenance & Safety division (Maintenance).

Inventory reports help refine the Uniform Functional Filing System™ (UFFS™ Index) created in the District’s Administrative Offices to accurately identify record series maintained in Maintenance, and allow management to review and designate records for inactive storage or other disposal.

Division Location

WWTP Bldg. S – Maintenance Building

Phase Tasks

1. Introduce the project to Maintenance staff.
2. Designate a Records Coordinator as the project point person.
3. Review Maintenance’s records in the Versatile Electronic Records Management System (Versatile) and compare to current record holdings.
4. Configure Versatile for data entry and project implementation.
5. Inventory records into Versatile.
6. Refine the UFFS™ Index to accurately identify records series within Maintenance.
7. Review inventory reports with the Records Coordinator and designated staff, as needed.
8. Classify records into the UFFS™ Index, refine the index as needed.
9. Designate any inactive records for storage or destruction, as needed.
10. Prepare designated inactive records for storage:
 - a. Create inactive box entries in Versatile.
 - b. Assign box number labels to inactive boxes.
 - c. Associate inventoried inactive records with the assigned box number.
11. Review associated Maintenance retention schedules, if any.
12. Prepare any obsolete records for destruction approvals, as needed.

RCS will review Maintenance’s current file inventory listings in Versatile and compare the entries to existing files in active storage areas. Files not entered into Versatile are added based on existing folder label titles.

RCS will then work with the designated Records Coordinator, and Maintenance staff as needed, to review inventory reports, classify records into the UFFS™ Index, and designate files as active, inactive or obsolete. RCS will refine the UFFS™ Index to accurately list records series (types of records) maintained in Maintenance.

Any records designated as inactive are boxed and prepared for storage in the District’s Records Center. RCS will create entries for each box in Versatile, assign the file folders to the corresponding box entry, and label boxes for storage.

Any records designated as obsolete are similarly prepared for destruction approval and processing.

RCS requires access the Versatile software using secure company laptops, or capable District computers, connected to the District’s network. RCS also requires administrator-level access to the database server via Microsoft SQL Server Management to allow data importing and exporting.

Phase Implementation Costs

RCS Professional Fees and Labor:	\$ 5,600.00
Supplies (estimate):	\$ 127.19
RCS Travel Expenses (estimate):	<u>\$ 220.80</u>
Total:	\$ 5,947.99

Fixed cost Professional Fees & Labor listed above include all costs for phase development and RCS labor for program implementation. Invoices for RCS Professional Fees and Labor will be submitted according to the following schedule:

Progress payment 1: \$1,904.00 at phase initiation

Progress payment 2: \$1,848.00 after completion of Phase Task 12

See Terms and Disclaimer sections of this proposal for RCS service and professional fee payment details.

To implement the program as recommended, the District must purchase certain supplies. Estimates above are based on retail vendor pricing as of the date of this proposal.

Supply estimates include:

- Inactive storage boxes
- Self-adhesive labels
- Taxes and shipping

RCS does not sell any supplies, equipment or software and all estimates are based on direct purchase from vendors. Listed items may be purchased at a discount through the District's vendors, provided that they are of comparable quality to RCS recommendations.

Phase Results

Implementation of this phase will provide Maintenance & Safety with:

- Integration into the Electronic Records Management System for tracking and managing physical records.
- A comprehensive inventory of all active records.
- Inactive and obsolete records processed for storage or destruction, respectively.
- Refining the UFFS™ Index to identify and classify all Maintenance & Safety records.

Phase Duration Estimate

Depending upon Maintenance staff availability and prior RCS client obligations, this phase can be completed in approximately 4 to 6 weeks after initiation.

Phase 9 – Fleet Inventory

Implementation of this phase provides a uniform, functional filing system for decentralized active records within the Fleet division (Fleet).

Inventory reports help refine the Uniform Functional Filing System™ (UFFS™ Index) created in the District's Administrative Offices to accurately identify record series maintained in Fleet, and allow management to review and designate records for inactive storage or other disposal.

Division Location

WWTP Bldg. Q – Fleet Maintenance

Phase Tasks

1. Introduce the project to Fleet's management and staff.
2. Designate a Records Coordinator as the project point person.
3. Review Fleet's records in the Versatile Electronic Records Management System (Versatile) and compare to current record holdings.
4. Configure Versatile for data entry and project implementation.
5. Inventory records into Versatile.
6. Refine the UFFS™ Index to accurately identify records series within Fleet.
7. Review inventory reports with the Records Coordinator and designated staff, as needed.
8. Classify records into the UFFS™ Index, refine the index as needed.
9. Designate any inactive records for storage or destruction, as needed.
10. Prepare designated inactive records for storage:
 - a. Create inactive box entries in Versatile.
 - b. Assign box number labels to inactive boxes.
 - c. Associate inventoried inactive records with the assigned box number.
11. Review associated Fleet retention schedules, if any.
12. Prepare any obsolete records for destruction approvals, as needed.

RCS will review Fleet's current file inventory listings in Versatile and compare the entries to existing files in active storage areas. Files not entered into Versatile are added based on existing folder label titles.

RCS will then work with the designated Records Coordinator, and Fleet staff as needed, to review inventory reports, classify records into the UFFS™ Index, and designate files as active, inactive or obsolete. RCS will refine the UFFS™ Index to accurately list records series (types of records) maintained in Fleet.

Any records designated as inactive are boxed and prepared for storage in the District's Records Center. RCS will create entries for each box in Versatile, assign the file folders to the corresponding box entry, and label boxes for storage.

Any records designated as obsolete are similarly prepared for destruction approval and processing.

RCS requires access the Versatile software using secure company laptops, or capable District computers, connected to the District's network. RCS also requires administrator-level access to the database server via Microsoft SQL Server Management to allow data importing and exporting.

Phase Implementation Costs

RCS Professional Fees and Labor:	\$ 3,500.00
Supplies (estimate):	\$ 35.18
RCS Travel Expenses (estimate):	<u>\$ 147.20</u>
Total:	\$ 3,682.38

Fixed cost Professional Fees & Labor listed above include all costs for phase development and RCS labor for program implementation. Invoices for RCS Professional Fees and Labor will be submitted according to the following schedule:

Progress payment 1: \$1,750.00 at phase initiation

Progress payment 2: \$1,750.00 after completion of Phase Task 12

See Terms and Disclaimer sections of this proposal for RCS service and professional fee payment details.

To implement the program as recommended, the District must purchase certain supplies. Estimates above are based on retail vendor pricing as of the date of this proposal.

Supply estimates include:

- Inactive storage boxes
- Self-adhesive labels
- Taxes and shipping

RCS does not sell any supplies, equipment or software and all estimates are based on direct purchase from vendors. Listed items may be purchased at a discount through the District's vendors, provided that they are of comparable quality to RCS recommendations.

Phase Results

Implementation of this phase will provide Fleet with:

- Integration into the Electronic Records Management System for tracking and managing physical records.
- A comprehensive inventory of all active records.
- Inactive and obsolete records processed for storage or destruction, respectively.
- Refining the UFFS™ Index to identify and classify all Fleet division records.

Phase Duration Estimate

Depending upon Fleet staff availability and prior RCS client obligations, this phase can be completed in approximately 2 to 4 weeks after initiation.

Phase 10 – MF/RO Inventory

Implementation of this phase provides a uniform, functional filing system for decentralized active records within the Membrane Filtration / Reverse Osmosis area (MF/RO).

Inventory reports help refine the Uniform Functional Filing System™ (UFFS™ Index) created in the District’s Administrative Offices to accurately identify record series maintained in MF/RO, and allow management to review and designate records for inactive storage or other disposal.

Division Location

WWTP Bldg. R – MF UV

Phase Tasks

1. Designate a Records Coordinator as the project point person.
2. Review MF/RO’s records in the Versatile Electronic Records Management System (Versatile) and compare to current record holdings.
3. Configure Versatile for data entry and project implementation.
4. Inventory records into Versatile.
5. Refine the UFFS™ Index to accurately identify records series within MF/RO.
6. Review inventory reports with the Records Coordinator and designated staff, as needed.
7. Classify records into the UFFS™ Index, refine the index as needed.
8. Designate any inactive records for storage or destruction, as needed.
9. Prepare designated inactive records for storage:
 - a. Create inactive box entries in Versatile.
 - b. Assign box number labels to inactive boxes.
 - c. Associate inventoried inactive records with the assigned box number.
10. Review associated MF/RO retention schedules, if any.
11. Prepare any obsolete records for destruction approvals, as needed.

RCS will review MF/RO’s current file inventory listings in Versatile and compare the entries to existing files in active storage areas. Files not entered into Versatile are added based on existing folder label titles.

RCS will then work with the designated Records Coordinator, and MF/RO staff as needed, to review inventory reports, classify records into the UFFS™ Index, and designate files as active, inactive or obsolete. RCS will refine the UFFS™ Index to accurately list records series (types of records) maintained in MF/RO.

Any records designated as inactive are boxed and prepared for storage in the District’s Records Center. RCS will create entries for each box in Versatile, assign the file folders to the corresponding box entry, and label boxes for storage.

Any records designated as obsolete are similarly prepared for destruction approval and processing.

RCS requires access the Versatile software using secure company laptops, or capable District computers, connected to the District’s network. RCS also requires administrator-level access to the database server via Microsoft SQL Server Management to allow data importing and exporting.

Phase Implementation Costs

RCS Professional Fees and Labor:	\$ 17,500.00
Supplies (estimate):	\$ 646.79
RCS Travel Expenses (estimate):	<u>\$ 588.80</u>
Total:	\$ 18,735.59

Fixed cost Professional Fees & Labor listed above include all costs for phase development and RCS labor for program implementation. Invoices for RCS Professional Fees and Labor will be submitted according to the following schedule:

Progress payment 1: \$5,950.00 at phase initiation

Progress payment 2: \$5,775.00 after completion of Phase Task 4

Progress payment 3: \$5,775.00 after completion of Phase Task 11

See Terms and Disclaimer sections of this proposal for RCS service and professional fee payment details.

To implement the program as recommended, the District must purchase certain supplies. Estimates above are based on retail vendor pricing as of the date of this proposal.

Supply estimates include:

- Inactive storage boxes
- Self-adhesive labels
- Taxes and shipping

RCS does not sell any supplies, equipment or software and all estimates are based on direct purchase from vendors. Listed items may be purchased at a discount through the District's vendors, provided that they are of comparable quality to RCS recommendations.

Phase Results

Implementation of this phase will provide MF/RO with:

- Integration into the Electronic Records Management System for tracking and managing physical records.
- A comprehensive inventory of all active records.
- Inactive and obsolete records processed for storage or destruction, respectively.
- Refining the UFFS™ Index to identify and classify all MF/RO division records.

Phase Duration Estimate

Depending upon MF/RO staff availability and prior RCS client obligations, this phase can be completed in approximately 13 to 15 weeks after initiation.

Additional RCS Services

RCS will provide on-demand program maintenance and professional consulting services to the District for short-term, continual Records Management Program improvements.

Program maintenance tasks may include, but are not limited to, the following tasks:

- Inactive records center activities
 - Box processing, including form creation, labeling and shelving
 - Box and/or record entry updates in the Versatile database
 - Record packaging or repackaging and preparation for storage
 - Records destruction assistance
 - Record disposition reviews and retention determination
- Active records management activities
 - Label creation and modifications
 - Record disposition reviews and retention determination
- Other program maintenance related activities

Professional consulting service tasks may include, but are not limited to, the following tasks:

- Electronic document/content management evaluation and configuration
- Electronic records management system evaluation and configuration
- Records retention schedule updates and research
- Information governance improvements, assessments and evaluations
- Policy and procedure development
- Other system improvement design and development

RCS may require access the Versatile software using secure company laptops, or capable District computers, connected to the District's network for on-demand service requests. RCS also may require administrator-level access to the database server via Microsoft SQL Server Management to allow data importing and exporting.

On-demand Program Services:

RSA Professional Fees & Travel Expenses: **\$ 65,000.00**

On-demand services are billed in 15-minute minimum increments, with any portion of the increment billed as a whole, at the following rates:

Program Maintenance Hourly Rate per Person: \$ 150.00
Professional Consulting Hourly Rate per Person: \$ 180.00

Actual travel expenses for on-demand services are billed at current IRS mileage allowance rates

See Terms and Disclaimer sections of this proposal for RCS service and professional fee payment details.

Terms:

- Unless otherwise noted, professional fees include all costs for labor and are firm for a period of 60 days from the date of this proposal. RCS reserves the right to extend this period to allow for annual budgeting processes.
- Invoices will be due upon receipt by the District, and payment must be received by RCS within 30 days of the invoice date. If payment is not received within 30 days of the invoice date, the invoice will be resubmitted with a 2.5% late fee and a \$75.00 administrative charge added to the total invoice amount. Late fees are compounded for each 30-day late period.
- RCS does not sell supplies, equipment or software, nor does RCS maintain a reseller's license. Therefore, all software, supply and equipment costs are estimates based on RCS recommended vendors. Software, supplies and equipment may be purchased through the District's current vendors, provided that they are of comparable quality to RCS recommendations.
- Unless otherwise noted, taxes, shipping, handling, maintenance and/or other support costs are not included in this proposal.
- All travel expenses are estimates. Actual expenses will be billed periodically as incurred by RCS staff and principals.
- Project duration estimates depend upon District staff availability. If project implementation is delayed due to availability of District staff, RCS reserves the right to modify payment schedules according to completed project tasks and/or delay timelines.
- Project tasks are presented in the anticipated order of implementation. RCS reserves the right to modify the order of project tasks to efficiently complete implementation, as necessary.
- TM UFFS, Unified Functional Filing System, and the index structure and format are trademarked proprietary information by Records Systems Associates, Inc. 1976. All rights reserved. All program tasks, recommendations, suggestions and/or other project development information are the proprietary information of Records Control Services, Inc. Any and all information contained in this proposal, or its attachments, if any, shall not be released or made available to any entity outside of the District or its agents, except in response to a subpoena, court order, or request under the Public Records Act. In case of a request under the Public Records Act, RCS reserves the right to proceed under section 1.40.090 of the District Code to protect its interests, if any, under Government Code section 6254.7 Subsection (d).

Disclaimer:

All recommendations, management systems, research or other information or work papers resulting from implementation of this proposal are suggestions to the District. The District is responsible for the disposition or destruction of any documents designated active, inactive or obsolete. RCS will not alter or destroy, in any way, District documents, regardless of format, without specific written approval from the District or its authorized agents. RCS will not be responsible for loss or damage to the District or its agents, monetary or otherwise, resulting from implementation of this proposal or program, including, but not limited to, destruction of records by the District, or other damage to or loss of District documents, records and/or other information or sources of information.

In addition to design and implementation of services mentioned above, this proposal may include development of suggested record retention periods and schedules. Record retention periods are often arbitrary time periods based upon industry operational requirements. If required, RCS will perform a reasonable search of specific record retention information resources to obtain suggested retention periods for designated District records and information. The District is responsible for reviewing and approving any suggested retention periods with its legal counsel,

the executive management team, and the District Board of Directors, prior to implementation and/or document disposition or destruction.

By accepting and implementing this proposal, the District agrees to this disclaimer and all terms mentioned herein, and shall indemnify, defend and hold harmless RCS against any and all loss or damage resulting from the design and/or implementation of recommendations and/or suggestions within this proposal, except to the extent that the loss or damage is caused by the willful misconduct or negligence of RCS.

<input type="checkbox"/> Other	<input checked="" type="checkbox"/> Staff	<input type="checkbox"/> Informational
REPORT:	D. Lopez	<input type="checkbox"/> Board Member

Recommendation:

Staff recommends the Board of Directions affirm, by Motion, that the Emergency Response Plan policy should remain in place without revision.

Summary:

In accordance with Strategic Plan Initiative 3.01.04, to annually review 25% of District policies, staff recently reviewed the Emergency Response Plan policy. Staff has determined that the current policy remains applicable and requires no proposed changes.

The existing Emergency Response Plan policy P300-12-1 authorizes the Emergency Manager to proclaim a District State of Emergency and activate the Emergency Response Plan. The Board of Directors shall meet within 10 days of the Declaration of Emergency to proclaim, by resolution, the District State of Emergency and to authorize continued emergency and recovery operations.

Staff has reviewed the policy and determined that the policy is still appropriate in its current form and that no changes are needed. This policy is scheduled to be reviewed again in 2020.

Policy

Policy No.:	Type of Policy: Operations
Policy Title: Emergency Response Plan (ERP)	
Policy Description: Designation of District Emergency Manager and authorization to manage emergency operations	
Approval Date: 5/1/2012	Last Review Date: 2016
Approval Resolution No.: 14-12	Next Review Date: 2020
Rescinded Resolution No.: 2-06	Rescinded Resolution Date: 1/10/2006

It is the policy of the Board of Directors of Dublin San Ramon Services District:

The General Manager or successor is designated as the District's Emergency Manager who will direct District emergency response activities after natural or malevolent emergency events.

1. Under emergency conditions in which immediate action must be taken to protect lives and property, respond to emergencies, and to restore essential services for public health and safety, the Emergency Manager may proclaim a District State of Emergency and activate the Dublin San Ramon Services District Emergency Response Plan.

2. Upon activation of the District Emergency Response Plan, the Emergency Manager will direct and manage all emergency operations and make decisions to allocate resources and expend funds as necessary to meet the needs of the emergency.

3. During any state of emergency, the District's priorities will be to: 1) protect human life and health, 2) protect property, and, 3) protect the environment while at all times protecting the safety of our work force. After the state of emergency has been stabilized, DSRSD will take action to ensure its customers will have confidence in the water supply and in DSRSD.

Policy No.:	Policy Title: Emergency Response Plan (ERP)
--------------------	--

4. The Board of Directors shall meet within ten (10) days of the Declaration of Emergency to proclaim by official Board resolution the Declaration of the District State of Emergency and to authorize continued emergency operations and recovery operations.

5. The Declaration of the District State of Emergency shall remain in effect for fourteen (14) days from the date of Board resolution and shall be renewed by the Board of Directors every fourteen (14) days, unless terminated by the Emergency Manager and the Board of Directors.

6. The General Manager shall have the ongoing responsibility to ensure District compliance with evolving emergency response and preparedness legislation and regulation.

Policy is current and no changes need to be adopted by the Board of Directors. <u>Status Quo Chronology:</u>

Recommendation:

Staff recommends the Board of Directions affirm, by Motion, that the Sewer System Overflows policy should remain in place without revision.

Summary:

In accordance with Strategic Plan Initiative 3.01.04, to annually review 25% of District policies, staff recently reviewed the Sewer System Overflows policy. Staff has determined that the current policy remains applicable and requires no proposed changes.

The District’s responsibility and priority is to respond to sewer system overflows as soon as possible upon discovery or notification and follow reporting procedures and timeline requirements as set forth by the San Francisco Bay Regional Water Quality Control Board and the California State Water Resources Control Board. On a public sewer, the District shall take appropriate action to secure the wastewater overflow area, relieve the cause of the overflow, and provide cleanup to minimize health hazards and protect the environment. On a private sewer, the District shall take appropriate action if requested and given permission by the property owner or by a proper authority. The District will notify CSRMA for potential claims management assistance should the sewer system overflow be found to be District responsibility.

Staff has reviewed the policy and determined that the policy is still appropriate in its current form and that no changes are needed. This policy is scheduled to be reviewed again in 2020.

It is the policy of the Board of Directors of Dublin San Ramon Services District:

The District's responsibility and priority is to respond to sewer system overflows as soon as possible upon discovery or notification. On a public sewer, District's employees shall take appropriate action to secure the wastewater overflow area, relieve the cause of the overflow, and ensure that the affected area is cleaned as soon as possible to minimize health hazards to the public and protect the environment. On a private sewer, District's employees will take appropriate action if requested and given permission by the property owner or business owner or if requested by a proper authority such as a health officer, fire department representative or city representative. The District will follow reporting procedures and timeline requirements in regards to sewer spills as set forth by the San Francisco Bay Regional Water Quality Control Board and the California State Water Resources Control Board. On a sewer overflow or backup on public or private property or one which affects private property, the District will notify CSRMA as soon as reasonably possible for potential claims management assistance should the spill / overflow be found to be District responsibility. The District will invoice the appropriate entity for actual costs incurred for work associated with private sewers.

The General Manager shall develop comprehensive rules and procedures in furtherance of this policy.

REPORT:	<input type="checkbox"/> Verbal	<input type="checkbox"/> Presentation
	<input checked="" type="checkbox"/> Staff	J. Archer
		<input type="checkbox"/> Board Member

Recommendation:

Staff recommends the Board of Directors hold a public hearing and adopt, by Resolution, the Engineer's Report and direct staff to levy the annual assessments in the Dougherty Valley Standby Charge District 2001-1 for Fiscal Year 2016-2017.

Summary:

This action must be taken by the Board in order to levy assessments in the Dougherty Valley Standby Charge District 2001-1 for Fiscal Year 2016-2017. The Board adopted the Resolution of Intention on July 19, 2016, which is required prior to adopting the Engineer's Report and directing the levy.

Each year, Zone 7 provides estimated costs associated with the State Department of Water Resources (DWR) specifically tied to providing water service to Dougherty Valley. An updated Engineer's Report is prepared that shows a projection of the costs expected to be incurred in the upcoming fiscal year and the allocation of those costs based upon equivalent dwelling units ("EDU's"). The Board initially adopts a resolution of intention to levy annual assessments, followed by a public hearing at the next Board meeting. After the public hearing, the Board adopts the Engineer's Report and directs the levy of the assessment. These assessments are then placed on the tax roll.

The annual assessment for FY2017 is \$1,561,422.38 or \$170.75 per EDU.

RESOLUTION NO. ____

A RESOLUTION OF THE BOARD OF DIRECTORS OF DUBLIN SAN RAMON SERVICES DISTRICT ADOPTING ENGINEER'S REPORT AND DIRECTING THE LEVY OF ANNUAL ASSESSMENTS IN THE DUBLIN SAN RAMON SERVICES DISTRICT DOUGHERTY VALLEY STANDBY CHARGE DISTRICT 2001-1 FOR FISCAL YEAR 2016-2017

RESOLVED by the Board of Directors (the "Board") of the Dublin San Ramon Services District (the "District"), County of Contra Costa (the "County"), State of California, as follows:

WHEREAS, this Board has previously completed its proceedings in accordance with and pursuant to Article XIII D of the California Constitution and the Uniform Standby Charge Procedures Act, Sections 54984 *et seq.*, of the California Government Code (together, the "Act") to establish the District's Dougherty Valley Standby Charge District 2001-1 (the "Assessment District"); and

WHEREAS, under the Act, this Board is authorized to levy assessments each year for the Assessment District and on July 19, 2016, this Board adopted Resolution No. 42-16, a Resolution of the Board of Directors of the Dublin San Ramon Services District of Intention to Levy Annual Assessments for the Dublin San Ramon Services District Dougherty Valley Standby Charge District 2001-1 for Fiscal Year 2016-2017 (the "Intention Resolution") and preliminarily approved a special Engineer's Report (the "Engineer's Report") prepared pursuant to the Act for purposes of the levy of assessments for Fiscal Year 2016-2017 (the "Next Fiscal Year"); and

WHEREAS, as specified in the Intention Resolution, and upon notice as required by the Act, this Board held a Public Hearing August 2, 2016, on the issue of the levy of the assessments for the Next Fiscal Year, and all persons desiring to be heard were given an opportunity to be heard, and all objections to the assessment were considered by this Board.

NOW, THEREFORE, IT IS ORDERED as follows:

1. Objections and Protests. No objections or protests against the annual levy of assessments for the Assessment District, as a whole or as to any part thereof, or against the estimate of costs and the assessments, in whole or in part, were received prior to or at the Public Hearing.

2. Public Interest. The public interest, convenience and necessity require the levy of annual assessments for the Assessment District.

3. District Described. The Assessment District specially benefited and to be assessed to pay the costs and expenses thereof, and the exterior boundaries thereof, are as shown by the assessment diagram thereof filed in the offices of the District, which map is made a part hereof by reference thereto.

4. Engineer's Report Approved. The Engineer's Report, in the form on file with the District and to which reference is hereby made for further particulars, including the estimates of costs and expenses, the apportionment of assessments and the assessment diagram contained in the Engineer's Report, is hereby approved and confirmed and shall stand as the Engineer's Report for the Next Fiscal Year.

Res. No. _____

5. Benefits Determined. Based on the oral and documentary evidence, including the Engineer's Report, offered and received at the public hearing, this Board expressly finds and determines that each of the several subdivisions of land in the Assessment District will be specially benefited.

6. Collection of Assessments. The assessments herein confirmed shall be collected in accordance with the provisions of Resolution No. 20-01. The Finance Director (as therein defined) is hereby authorized and directed to cause such collections to be made for the Next Fiscal Year.

7. Effective Date. This resolution shall be effective upon the date of its adoption.

ADOPTED by the Board of Directors of Dublin San Ramon Services District, a public agency in the State of California, counties of Alameda and Contra Costa, at its regular meeting held on the 2nd day of August, 2016, and passed by the following vote:

1. ENGINEER'S LETTER

WHEREAS, on May 1, 2001, the Board of Directors (the "Board") of the Dublin San Ramon Services District (the "District"), County of Contra Costa, State of California, under the Uniform Standby Charge Procedures Act, being Chapter 12.4 (commencing with Section 54984) of Part 1, Division 2 of Title 5 of the California Government Code (the "Act"), adopted its Resolution to Initiate Proceedings to Fix Standby Charges (the "Resolution to Initiate") for the fixing of Standby Charges to pay certain costs of the District incurred or to be incurred by the District as of certain agreements between the District and Alameda County Flood Control and Water Conservation District, Zone 7 to serve California State Water Project to the Dougherty Valley; and

WHEREAS, the Board desires to fix a maximum Standby Charge for each Equivalent Dwelling Unit (EDU) of the Dougherty Valley Service area; and

WHEREAS, the District's cost obligation to Zone 7 includes the annual payments to Zone 7 for 6,080 acre feet of State Water Project water for Zone 7 and annual payments to Zone 7 for 43,000 acre feet of water storage in Semitropic Water Storage Directory ("Semitropic"); and

WHEREAS, the Board desires to collect the money necessary to make required Zone 7 payments under provisions of the Act; and

WHEREAS, the Resolution to Initiate directed the undersigned to make and file a report presenting those materials specified in Section 54984.3 of the Act, to which Resolution to Initiate reference is hereby made for further particulars; and

WHEREAS, the Act provides that any Standby Charges imposed thereunder are deemed to be assessments and this Report presents such Standby Charges as and denominates them as "Assessments";

NOW, THEREFORE, the following Assessment is made to cover the annual costs of the charges and the costs and expenses incidental thereto:

SUMMARY OF ASSESSMENT

Description	As Originally Approved	As Confirmed by the Board
Charges		
State Water Project	\$1,505,542.00	\$1,505,542.00
Semitropic Water Storage	0.00	0.00
<i>Subtotal</i>	\$1,505,542.00	\$1,505,542.00
Administration		
Total Administration Costs	\$326,163.82	\$326,163.82
Carryover Contribution	(\$0.00)	(\$0.00)
Total Costs	\$1,831,705.82	\$1,831,705.82
Maximum Assessment	\$1,561,479.03	\$1,561,479.03
Rounding Adjustment	(56.65)	(56.65)
Total Assessment	\$1,561,422.38	\$1,561,422.38

I, the undersigned, do hereby assess and apportion the total assessment of the total cost of the acquisitions, work and improvements upon the several lots, pieces or parcels or portions of lots or subdivisions of land liable therefore and benefited thereby, and hereinafter numbered to correspond with the numbers upon the attached assessment diagram, upon each, severally and respectively, in accordance with the benefits to be received by such subdivisions, respectively, from the Assessments, and more particularly set forth in the list hereto attached and by reference made a part hereof.

The Assessment is made upon the several subdivisions of land within the Dougherty Valley Standby Charge District 2001-1 (the "Standby Charge District") in proportion to the estimated benefits to be received by the subdivisions, respectively, from the Assessments. An Assessment Diagram for the Standby Charge District has been submitted to the District Secretary in the format required under the provisions of the Act. The lines and dimensions shown on maps of the County Assessor of the County of Contra Costa for the current year are incorporated by reference herein and made part of this Report.

Each subdivision of land assessed is described in the Assessment Roll by reference to its parcel number as shown on the Assessor's Maps of the County of Contra Costa for Fiscal Year 2016/17 and includes all of such parcel excepting those portions thereof within existing public roads or right of way to be acquired in these proceedings for public road purposes. For a more particular description of said property, reference is hereby made to the deeds and maps on file and of record in the office of the County Recorder of the County of Contra Costa.

The assessment has been levied in accordance with the assessment methodology adopted and approved by the Board at the time of the Standby Charge District formation.

Dated: July 21, 2016

By: [Signature]

2. ESTIMATE OF COSTS

The cost of servicing, maintaining, repairing, and replacing the actual improvements as described in the plans and specifications are summarized as follows.

2.1. Dougherty Valley Standby Charge District 2001-1 Budget

The budget for the Standby Charge District is outlined in the following table. The total annual assessment per EDU is described in Section 3.1.

Engineer's Cost Estimate	
Description	Budget
Charges	
State Water Project Costs (Zone 7)	\$1,505,542.00
Administrative Charges & Fees	
Engineer's Report	10,000.00
District Administration Charge (15%), (1)	225,831.30
Notice, Recording, Miscellaneous Contingencies (1%), (2)	15,055.41
Contingency (5%), (3)	<u>75,277.10</u>
<i>Subtotal</i>	\$326,163.81
Total Cost	\$1,831,705.81
Less: Carryover Contribution (estimated)	(\$0.00)
Maximum Assessment for Fiscal Year 2016/17	\$1,561,479.03
Rounding Adjustment	(56.65)
Total Levy for Fiscal Year 2016/17	\$1,561,422.38
Assessable EDU for Fiscal Year 2016/17	9,144.826
Assessment Per EDU for Fiscal Year 2016/17	\$170.75
Maximum Assessment Per EDU, Per Original Formation, (4)	\$170.75

(1) Annual Administration Charge – 15% of combined Water and Storage Charges.

(2) Contingencies – 1% of combined Water and Storage Charges.

(3) Contingencies – 5% of combined Water and Storage Charges.

(4) \$170.75 is the maximum allowable rate per EDU.

3. ASSESSMENTS

The actual assessment and the amount of the Assessment for Fiscal Year 2016/17 apportioned to each parcel as shown on the latest equalized roll at the County Assessor's office are listed in Section 5 of this Report. The description of each lot or parcel is part of the records of the County Assessor of the County of Contra Costa and such records are, by reference, made part of this Report.

3.1. Method of Apportionment

The Assessments are apportioned according to the special benefits received by the lots, pieces, and parcels of land within the Standby Charge District. The proportionate benefit derived by each parcel is determined in relationship to the entirety of the Standby Charges. No assessment has been apportioned on any parcel that exceeds the reasonable cost of the proportional benefit conferred on that parcel.

Under this Report the Assessments for the Standby Charge District are apportioned in accordance with the foregoing and using the following criteria.

The Assessments for each parcel of land were apportioned based on the number of projected EDUs for build-out within that parcel.

For this purpose, a single family detached dwelling unit is equal to 1.0 EDU, a multi-family attached dwelling unit is equal to .40 EDU, and each acre of commercial land is equal to 4.0 EDU.

With respect to Windemere Ranch, the number of EDUs per parcel were originally determined at the time of district formation from the approved tentative subdivision maps for Phase 1, and for future phases, the number of EDUs per parcel were estimated by evenly distributing the remaining approved dwelling units within the project per the Dougherty Valley Specific Plan over the developable acreage within each parcel because the zoning is the same. No EDUs were assigned to parks, schools or open space areas. For this Report, the estimate of EDUs per parcel was updated based on current development for parcels that were subdivided.

With respect to Gale Ranch, the number of EDUs per parcel was originally determined at the time of district formation from the approved tentative subdivision map for Phase 2, and the tentative subdivision map dated May 27, 2001, submitted to the Contra Costa County for review for Phase 3. For the remaining areas of Gale Ranch (Phase 4), the number of EDUs was estimated based on the total approved dwelling units and non-residential land uses per the Dougherty Valley Specific Plan. No EDUs were assigned to parks, schools, or open space areas. For this Report, there have been no subdivisions or changes to the assumptions.

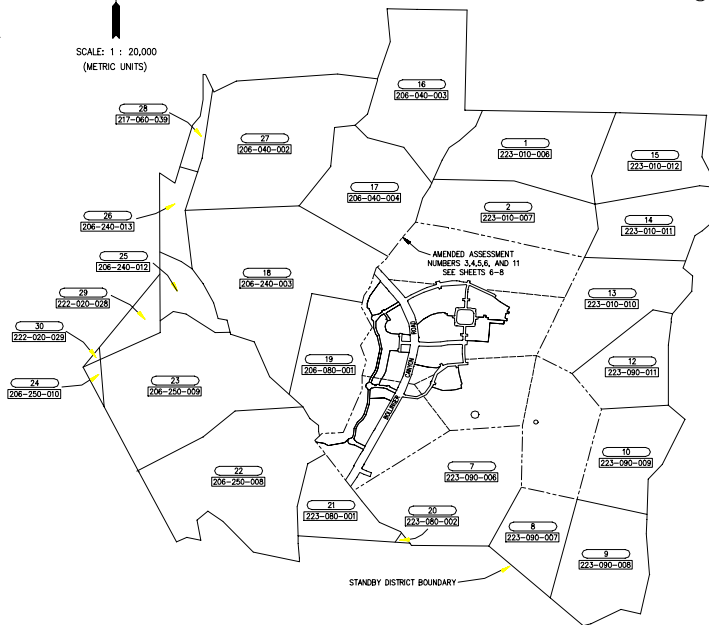

(Note: Phase 1 of Gale Ranch is not included in the Standby Charge District)

4. ASSESSMENT BOUNDARY MAP

An Assessment Diagram for the Standby Charge District has been submitted to the Secretary of the Board in the format required under the provisions of the Act. The lines and dimensions shown on maps of the County Assessor of the County of Contra Costa for the current year are incorporated by reference herein and made part of this Report. A reduced copy is attached.

		<input type="checkbox"/> Board Member

Recommendation:

Staff recommends the Board of Directors approve, by Resolution, a health insurance premium contribution for the period of January 1, 2017 to December 31, 2017 for Stationary Engineers Local 39 (Local 39), Professional Employees Bargaining Unit (PEBU), Mid-Management Employees Bargaining Unit (MEBU), Confidential Employees Bargaining Unit (CEBU), and Senior Management employees.

Summary:

In mid-June of 2016, CalPERS notified contracting agencies of medical premium increases effective January 1 of the following calendar year. On an annual basis, in accordance with contractual requirements of existing labor contracts and Personal Services Agreements, and Section 22892 of the Public Employees, Medical and Hospital Care Act, the Board adopts a resolution to revise the employer contribution towards health insurance premiums. A copy of the resolution must be sent to CalPERS. On September 1, 2015, the Board adopted a resolution to set the employer contribution rate beginning January 1, 2016 for health insurance for Local 39, CEBU, PEBU, MEBU, and Senior Managers. All employees currently have the same employer contribution toward medical insurance, which is the District Maximum Contribution amount (cost-sharing of increases over the 2007 baseline amounts at 60% District-paid and 40% Employee-paid), with the Employee-paid share of the base plan at no more than 20%. The maximum District monthly contribution rate for health insurance premiums would increase to the amounts as follows, effective January 1, 2017:

For Stationary Engineers Local 39, Professional, Mid-Management, Confidential, and Senior Management employees:

Employee Only:	\$631
Employee + One:	\$1,262
Employee + Family:	\$1,640

There is no budgetary action required of the Board, as the budgeted amount for the employer’s contribution towards health insurance premiums is estimated to be sufficient to cover these costs. The District has fully complied with any and all applicable provisions of Government Code Section 7507 in electing the benefits set forth above. Staff has also reviewed the requirements of the employer mandate under the Patient Protection and Affordable Care Act (PPACA) and has determined that the District meets compliance requirements.

STAFF REPORT

Human Resources

August 2, 2016

2017 Medical Rate Changes

Background

Each year, per the requirements of Section 22892 of the California Government Code, and in accordance with established labor agreements and employment contracts, the Board of Directors of the Dublin San Ramon Services District (District) sets the annual maximum contribution toward employee medical premiums for the following year. The calculation for this contribution is determined by Memoranda of Understanding (MOU), by Personal Services Agreements (PSA), and the amount paid for Board members is determined annually, at the discretion and by resolution of the Board, which is traditionally set at the same amount as for employees.

Discussion

Overview

The maximum District contribution toward monthly health premiums will increase in 2017 (see attached, Tables 1 & 2). This amount is calculated based on the Base Plan, which is defined by labor agreements as the higher of the lowest cost HMO and PPO offered by CalPERS in the Bay Area region.¹ Per the labor agreements, any increase in cost of the base plan above the District maximum contribution from 2007 is shared 60% by the employer and 40% by employees, with employees then paying 100% of the premium rate above the District maximum contribution.

From 2016 to 2017, CalPERS Bay Area basic healthcare plan premiums rose on average 4.21% for HMO plans and 3.23% for PPO plans, which CalPERS staff attributed primarily to utilization and rising costs for prescription drugs.² See Table 3 for plan-specific premium changes ranging from a decrease of 9.3% for Health Net SmartCare to a 15.7% increase for Anthem Traditional.

Based on participation, plan selection, and coverage level, as of June 2016, the District has sufficient funds budgeted for health benefits for CY 2017. The District budgeted \$1,707,313, and projected District contributions, based on current employee enrollment data, are \$1,444,485.

Health Plan Changes

CalPERS Board of Directors eliminated the Blue Shield Net Value HMO plan for 2017. In order to mitigate member-provider disruption, existing Blue Shield Net Value members will automatically be enrolled into the Blue Shield Access Plus HMO if no other plan is elected during the annual open enrollment. The

¹ The 2017 Base Plan is PERS Select PPO

² CalPERS Pension and Health Benefit Committee Agenda Item 5, "Approval of 2017 HMO Plan Rates," and CalPERS Pension and Health Benefit Committee Agenda Item 6, "Approval of 2017 PPO Plan Rates."

elimination of this HMO brings the total number of HMO plans (6) and PPO plans (3) offered in the Bay Area up to nine (9) starting in 2017.

All CalPERS medical plans will now offer a Diabetes Prevention Program at no cost to the members. The Diabetes Prevention Program is designed to reach pre-diabetic plan members to prevent or reduce the onset of Type 2 diabetes.

Beginning 2017, CalPERS will contract with OptumRx as the new Pharmacy Benefit Manager (PBM) for CalPERS medical plans. In 2015, CalPERS solicited proposals to procure a new PBM contract. Nine companies submitted proposals and through an extensive selection and negotiation process, CalPERS selected OptumRx as the new PBM. CalPERS indicated their staff are working to ensure the transition away from CVS Caremark to OptumRx as the PBM will be as smooth as possible for members and physicians.

Active Employee Impact

Since 2014, there have been no health plans available to employees that are 100% District-paid; all plans require some contribution toward the cost of premiums by employees. The employee share of the premium for CalPERS plans will increase for some and decrease for others in 2017. The change in the employee share of monthly premium costs range from a decrease of 43.4% (Health Net SmartCare HMO) to an increase of 61.6% (Anthem HMO Select) at the family coverage level (see attached, Table 4).

For 2017, the employee share of the monthly premium at the family rate will range from a minimum of \$266.55 (Health Net SmartCare HMO) to a maximum of \$1,121.88 (UnitedHealthCare HMO). Of the nine plans offered, the District pays greater than 80% of the family coverage level for the following plans: Anthem HMO Select (80.5%); Health Net SmartCare HMO (86.0%); Kaiser (86.0%); and PERS Select (85.7%).

Due to premium increases for some plans, and while difficult to predict, the District may expect to see movement of participants between plans during the 2017 Open Enrollment period from September 12, 2016 to October 7, 2016 in an effort to reduce costs.

Affordable Care Act Compliance

Staff has reviewed the requirements under Section 4980H of the IRS Code of Regulations, pertaining to the Employer Shared Responsibility under Section 1513 of the Patient Protection and Affordable Care Act (PPACA) and has determined that:

- The District offers health insurance coverage to 100% of District employees;
- All CalPERS health plans offered in plan year 2017 provide minimum essential coverage and meet the minimum value standard under the law;
- The employee-only share of the premium for the lowest-cost plan offered through CalPERS meets the affordability standard safe harbor; and
- The District's contracting third-party agencies offer compliant health insurance coverage to temporary staff assigned to the District.

Based upon the above analysis, staff determined that the District continues to be compliant with the employer mandate under the PPACA.

RESOLUTION NO. _____

RESOLUTION OF THE BOARD OF DIRECTORS OF DUBLIN SAN RAMON SERVICES DISTRICT FIXING THE EMPLOYER CONTRIBUTION AT AN EQUAL AMOUNT FOR EMPLOYEES AND ANNUITANTS UNDER THE PUBLIC EMPLOYEES' MEDICAL AND HOSPITAL CARE ACT FOR STATIONARY ENGINEERS LOCAL 39, PROFESSIONAL, MID-MANAGEMENT, CONFIDENTIAL, AND SENIOR MANAGEMENT EMPLOYEES

WHEREAS, the Dublin San Ramon Services District is a contracting agency under Government Code Section 22920 and subject to the Public Employees' Medical and Hospital Care Act (the "Act"); and

WHEREAS, Government Code Section 22892(a) provides that a contracting agency subject to Act shall fix the amount of the employer contribution by resolution; and

WHEREAS, Government Code Section 22892(b) provides that the employer contribution shall be an equal amount for both employees and annuitants, but may not be less than the amount prescribed by Section 22892(b) of the Act; and

WHEREAS, the Stationary Engineers, Local 39 (Local 39), Professional Employees Bargaining Unit (PEBU) and Mid-Management Employees Bargaining Unit (MEBU) have met in good faith and agreed to labor contracts effective December 26, 2011 through December 17, 2017; and

WHEREAS, the Confidential Employees Bargaining Unit (CEBU) have met in good faith and agreed to labor contracts effective December 26, 2011 through April 30, 2018; and

WHEREAS, the Senior Management employees have Personal Services Agreements in place effective calendar years 2012 through 2017; and

WHEREAS, the specific language of these contracts establish the employer's monthly health benefit contribution to become effective January 1, 2017.

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD OF DIRECTORS OF DUBLIN SAN RAMON SERVICES DISTRICT, a public agency located in the counties of

Res. No. _____

Alameda and Contra Costa, California that:

- (a) The employer contribution for each employee or annuitant shall be the amount necessary to pay the full cost of his/her enrollment, including the enrollment of family members, in a health benefits plan or plans, effective on January 1, 2017, up to a maximum of:

Medical Group	Monthly Employer Contribution		
	Single	Two-Party	Family
002 Mid-Management Monthly	\$631.00	\$1,262.00	\$1,640.00
003 Senior Management Monthly	\$631.00	\$1,262.00	\$1,640.00
004 Confidential Monthly	\$631.00	\$1,262.00	\$1,640.00
005 Local 39 Monthly	\$631.00	\$1,262.00	\$1,640.00
011 Professional Monthly	\$631.00	\$1,262.00	\$1,640.00
007 Mid-Management Hourly	\$315.50	\$631.00	\$820.00
008 Senior Management Hourly	\$315.50	\$631.00	\$820.00
009 Confidential Hourly	\$315.50	\$631.00	\$820.00
010 Local 39 Hourly	\$315.50	\$631.00	\$820.00
012 Professional Hourly	\$315.50	\$631.00	\$820.00

Plus administrative fees and Contingency Reserve Fund assessments; and be it further resolved;

- (b) Dublin San Ramon Services District has fully complied with any and all applicable provisions of Government Code Section 7507 in electing the benefits set forth above; and be it further resolved;

- (c) That the participation of the employees and annuitants of Dublin San Ramon Services District shall be subject to determination of its status as an “agency or instrumentality of the state or political subdivision of a State” that is eligible to participate in a governmental plan within the meaning of Section 414(d) of the Internal Revenue Code, upon publication of final Regulations pursuant to such Section. If it is determined that Dublin San Ramon Services District would not qualify as an agency or instrumentality of

Res. No. _____

the state or political subdivision of a State under such final Regulations, CalPERS may be obligated, and reserves the right to terminate the health coverage of all participants of the employer; and be it further resolved;

(d) That the executive body appoint and direct, and it does hereby appoint and direct, Nicole Genzale, District Secretary, to file with the Board a verified copy of this resolution, and to perform on behalf of Dublin San Ramon Services District all functions required of it under the Act.

ADOPTED by the Board of Directors of Dublin San Ramon Services District, a public agency in the State of California, counties of Alameda and Contra Costa, at its regular meeting held on the 2nd day of August 2016, and passed by the following vote:

AYES:

Recommendation:

Staff recommends the Board of Directors approve, by Resolution, a health insurance premium contribution for the period of January 1, 2017 to December 31, 2017 for active boardmembers and annuitants.

Summary:

In mid-June of 2016, CalPERS notified contracting agencies of medical premium increases effective January 1 of the following calendar year. In the immediately prior agenda item, the Board is scheduled to set the health insurance premium contribution for all employees at the District which contribution amount is governed by the terms of existing labor agreements.

There are no comparable documents (policy or otherwise) that establish the health insurance premium contribution amount for boardmembers. Historically, the Board has approved premium contributions for active boardmembers similar to those adopted for employees. However, the Board has the discretion to set the contribution at any amount of its choosing. Current (calendar year 2016) monthly premium contributions are: \$627, \$1,254 and \$1,631 for each of the three coverage categories below, respectively.

Health insurance premium contributions for calendar year 2017 should be established for the following coverage categories as required by CalPERS:

- Employee Only
- Employee + One
- Employee + Family

“Employee” is a term specified in the California Government Code; for the purposes of this action it operatively means “boardmembers.”

It should be noted that per California Government Code 22892 of the Public Employees’ Medical and Hospital Care Act (PEMHCA), whatever premium contribution amount is set for active boardmembers will be the amount for retired boardmembers. The District has six retired boardmembers. Four of those have elected some level of coverage through the District. One retired boardmembers chose to participate in the retiree medical vesting program; the premium contributions for participants in the retiree medical vesting program are separately set by the State of California and are not the subject of this action.

No action maintains the current health care premium contributions, as noted above, in place.

RESOLUTION NO. _____

RESOLUTION OF THE BOARD OF DIRECTORS OF DUBLIN SAN RAMON SERVICES DISTRICT FIXING THE EMPLOYER CONTRIBUTION AT AN EQUAL AMOUNT FOR EMPLOYEES AND ANNUITANTS UNDER THE PUBLIC EMPLOYEES' MEDICAL AND HOSPITAL CARE ACT FOR BOARD OF DIRECTORS

WHEREAS, the Dublin San Ramon Services District is a contracting agency under Government Code Section 22920 and subject to the Public Employees' Medical and Hospital Care Act (the "Act"); and

WHEREAS, Government Code Section 22892(a) provides that a contracting agency subject to Act shall fix the amount of the employer contribution by resolution; and

WHEREAS, Government Code Section 22892(b) provides that the employer contribution shall be an equal amount for both employees and annuitants, but may not be less than the amount prescribed by Section 22892(b) of the Act; and

WHEREAS, the Board of Directors' monthly health benefit contribution amounts are set annually by resolution.

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD OF DIRECTORS OF DUBLIN SAN RAMON SERVICES DISTRICT, a public agency located in the counties of Alameda and Contra Costa, California that:

- (a) The employer contribution for each employee or annuitant shall be the amount necessary to pay the full cost of his/her enrollment, including the enrollment of family members, in a health benefits plan or plans, effective January 1, 2017, up to a maximum of:

Medical Group	Monthly Employer Contribution		
	Single	Two-Party	Family
700 Board of Directors (NPERS)	\$631	\$1,262	\$1,640

Res. No. _____

Plus administrative fees and Contingency Reserve Fund assessments, and be it further resolved;

(b) Dublin San Ramon Services District has fully complied with any and all applicable provisions of Government Code Section 7507 in electing the benefits set forth above, and be it further resolved;

(c) That the participation of the employees and annuitants of Dublin San Ramon Services District shall be subject to determination of its status as an “agency or instrumentality of the state or political subdivision of a State” that is eligible to participate in a governmental plan within the meaning of Section 414(d) of the Internal Revenue Code, upon publication of final Regulations pursuant to such Section. If it is determined that Dublin San Ramon Services District would not qualify as an agency or instrumentality of the state or political subdivision of a State under such final Regulations, CalPERS may be obligated, and reserves the right to terminate the health coverage of all participants of the employer; and be it further resolved;

(d) That the executive body appoint and direct, and it does hereby appoint and direct, Nicole Genzale, District Secretary, to file with the Board a verified copy of this resolution, and to perform on behalf of Dublin San Ramon Services District all functions required of it under the Act.

Res. No. _____

ADOPTED by the Board of Directors of Dublin San Ramon Services District, a public agency in the State of California, counties of Alameda and Contra Costa, at its regular meeting held on the 2nd day of August 2016, and passed by the following vote:

AYES:

NOES:

Recommendation:

Staff recommends the Board of Directors approve, by Motion, the response to Contra Costa County Grand Jury Report 1606 - "Reclaiming Our Water" prepared by staff.

Summary:

On May 24, 2016, the Contra Costa County Grand Jury mailed to the District a copy of Grand Jury Report 1606 - "Reclaiming Our Water" (Attachment 2). The report is a high level overview of the status of reclaimed water (recycled water) in Contra Costa County, as produced by Central Contra Costa Sanitary District and Contra Costa Water District. The District is included in the required response to the findings and recommendations due to our potable and recycled water service in Dougherty Valley, our experiences with grant funding and our proposed indirect potable reuse project. The transmittal letter of this report requires a response no later than August 31, 2016.

The response to the Grand Jury Report is required to be in a specific form as described in the transmittal letter. The District as respondent is required to report if it agrees with each finding, disagrees with each finding or partially disagrees with each finding. The District is required to respond on five of the report findings. Additionally, the District as respondent is required to reply on four recommendations. The response to each recommendation can be a statement of one of the following actions: (1) the recommendation has been implemented, with a summary describing the implemented action, (2) the recommendation has not yet been implemented, but will be implemented in the future with a time frame for implementation, (3) the recommendation requires further analysis, with a time frame not to exceed six months for the matter to be prepared for discussion, and (4) the recommendation will not be implemented because it is not warranted or is not reasonable, with an explanation thereof.

The findings and recommendations that the District is responding to concern state grants and low interest loans, the viability of indirect potable reuse projects, recycled water freeing-up potable water for other beneficial uses, the advisability of forming joint power agreements to facilitate reclaimed water projects and the viability of satellite wastewater treatment plants.

Staff has prepared a response to the findings and recommendations as shown on Attachment 1 and requests approval of the response.

Martinez, CA 94553-0091

SUBJECT: Dublin San Ramon Services District Response to Grand Jury Report 1606 - "Reclaiming Our Water" by the 2015-16 Contra Costa Grand Jury

Dear Mr. Simmons:

Dublin San Ramon Services District (DSRSD) has received the Contra Costa County Grand Jury Report 1606 - "Reclaiming Our Water." Per your transmittal letter, DSRSD is required to report actions with respect to each Finding, and to reply to each Recommendation. This letter is DSRSD's response to the report's Findings and Recommendations.

DSRSD found your report to be in substantial agreement with its own objectives, policies and practices over the last eleven years. DSRSD has been a regional leader in the potential of reclaiming wastewater for beneficial use. We have planned and funded projects for reclaimed water, which we most often refer to as recycled water (RW); developed District policies to encourage the use of recycled water and labored to encourage public acceptance of RW for beneficial use. We found your report a useful synopsis of the resource and potential DSRSD sees in recycled water. Our perspective is that your report is a high level overview of the work we have been doing in detail and at length for more than 11 years. More recently, in October of 2015, the DSRSD Board adopted a water supply policy that calls for DSRSD to recycle all of its wastewater flows by developing an expanded recycling program. DSRSD, in partnership with East Bay Municipal Utility District (EBMUD), is recycling virtually all its wastewater in the summer months.

Shown below is our response to the individual Findings and Recommendations shown in your letter of May 24, 2016. Per the table of Required Responses in p. 19 of your report, DSRSD is required to respond to Findings 3, 4, 5, 6, 9; and Recommendations 2, 3, 7, 9.

Finding 3: State matching grants and low-interest loans are available for small indirect potable reuse projects, which could potentially increase water supply. DSRSD partially disagrees with this finding. In recent conversations with the Department of Water Resources, DSRSD has been informed that the State Revolving Loan and Proposition 1 funding is currently oversubscribed and there are a significant number of projects already in the queue for consideration.

Indirect potable reuse projects may be more expensive than traditional water sources; however, given the limitations in additional water supplies, indirect potable reuse presents a viable alternative. At this time, DSRSD and its partner agencies, the Zone 7 Water Agency, the City of Livermore, the City of Pleasanton, as well as Cal Water, are studying the feasibility of potable reuse for the region. In order to develop and

implement an indirect potable reuse project funding assistance is required to reduce cost impacts to the communities that DSRSD serves.

Finding 4: Indirect potable reuse projects are ideal for areas in the County where other new water sources are unavailable. DSRSD partially disagrees with the finding. Indirect potable reuse (IPR) is a viable project when a surface water reservoir or groundwater basin can retain water for a period of time, as is required by regulations. DSRSD does not have its own reservoir. Furthermore, DSRSD's past planning and research studies show that the "fringe" groundwater basin within the DSRSD's service area has been found to be too saline, too impervious and the installation too costly to locate a workable IPR project in these areas. DSRSD is actively collaborating with its partner agencies so that we may use our collective resources to develop and implement a potable reuse project.

Finding 5: It is difficult to develop large recycled water projects without the cooperation and commitment of water purveyors and customers. DSRSD agrees with this finding. In the past, DSRSD and East Bay Municipal Utility District (EBMUD) created the DSRSD-EBMUD Recycled Water Authority (DERWA) to achieve economies of scale for the construction and operations of DSRSD's recycled water treatment facilities and the DERWA recycled water distribution system. As potable reuse is under evaluation as an additional water supply for the Tri-Valley Region, DSRSD must work with other agencies to develop the project, potentially achieve economies of scale for project cost, and to cooperate on shared water supply sources that may be impacted by this recycled water project.

Finding 6: Where recycled water can be wheeled to one customer, it could "free up" an equivalent amount of fresh water that could then be wheeled to another customer who might be willing to pay more, thus creating "win-win" results for recycled water. DSRSD agrees with this finding. DSRSD assumes that "customer" in this finding refers to water agencies based on the scenario outlined in the report. For this hypothetical win-win situation to be possible, all the obstacles noted on Page 10 of the report must be overcome.

Finding 9: Satellite wastewater treatment plants are feasible in situations where the user is distant from existing recycled water distributions systems, needs water for irrigation, and is able to meet the costs to build and operate the plant. DSRSD agrees with this finding. However, the feasibility of satellite treatment plants to provide recycled water for irrigation varies significantly depending on factors such as the location of the facility, the wastewater flow versus the recycled water demand, and the infrastructure to dispose of wastewater solids. As an example, a satellite wastewater treatment facility was evaluated for the Dougherty Valley area where CCCSD provides wastewater services and DSRSD provides water and recycled water services. It was determined that it was more feasible to divert wastewater from the CCCSD system into the DSRSD wastewater system for treatment and production of recycled water at DSRSD's regional treatment facility. DSRSD has initiated discussions about this diversion with CCCSD as means to support recycled water use in Contra Costa County.

Recommendation 2: CCCSD and CCWD should explore the feasibility of cooperatively developing an IPR injection well project. DSRSD is not named in Recommendation 2 and has no role in it. Therefore DSRSD cannot give a valid reply per California Penal Code Section 933.05(b).

Mr. Michael Simmons
August 2, 2016
Page 3 of 3

Recommendation 3: CCCSD, CCWD and DSRSD should consider the formation of a JPA to expand CCCSD's tertiary treatment capacity in order to free up fresh water for domestic and commercial customers. This recommendation requires further analysis. A more definitive objective and project would be required before consideration of a JPA.

Recommendation 7: The District should consider facilitating the use of satellite wastewater treatment plants, where appropriate. This recommendation has been implemented. DSRSD's policy and procedures require DSRSD to consider the most cost-effective and reliable possibilities when expanding DSRSD's facilities. DSRSD built its initial wastewater treatment plant (WWTP) in the 1950s and has expanded its wastewater treatment facilities through four phases. In the design of each phase, the use of satellite wastewater treatment plants was considered and rejected in favor of expanding the existing WWTP located in Pleasanton, Alameda County. The capital and operating cost of satellite wastewater treatment plants exceed the cost of expanding DSRSD's WWTP.

Recommendation 9: The County and Districts should consider meeting to discuss each District's need for land for demonstration of scaled-up recycling and desalination projects using green technologies, which may qualify for State grant money, and the County's ability to lease such land. This recommendation will not be implemented because it is not warranted. DSRSD's recycled water treatment facility is located at its WWTP property in Pleasanton, Alameda County. DSRSD supports the county working with agencies with facilities located within the county to provide land to reduce the cost of recycling and desalination projects.

Furthermore, DSRSD's water supply policy envisions recycling all of its wastewater at its WWTP, making satellite plants superfluous in the DSRSD service area.

Please let us know if you need any further explanation for any of the responses in this letter.

Sincerely,

Dwight "Pat" Howard
President, DSRSD Board of Directors

Grand Jury**Contra
Costa
County**

May 24, 2016

Madelyne (Maddi) Misheloff
Dublin San Ramon Services District
7051 Dublin Blvd.
Dublin, CA 94568

Dear Ms. Misheloff:

Attached is a copy of Grand Jury Report No. 1606, "Reclaiming our Water" by the 2015-2016 Contra Costa Grand Jury.

In accordance with California Penal Code Section 933.05, this report is being provided to you at least two working days before it is released publicly.

In accordance with Section 933.05(a), the responding person or entity shall report one of the following actions in respect to each finding:

- (1) The respondent agrees with the finding.
- (2) The respondent disagrees with the finding.
- (3) The respondent partially disagrees with the finding.

In the cases of both (2) and (3) above, the respondent shall specify the portion of the finding that is disputed, and shall include an explanation of the reasons thereof.

In addition, Section 933.05(b) requires that the respondent reply to each recommendation by stating one of the following actions:

1. The recommendation has been implemented, with a summary describing the implemented action.
2. The recommendation has not yet been implemented, but will be implemented in the future, with a time frame for implementation.
3. The recommendation requires further analysis. This response should explain the scope and parameters of the analysis or study, and a time frame for the matter to be prepared for discussion. This time frame shall not exceed six months from the date of the publication of the Grand Jury Report.
4. The recommendation will not be implemented because it is not warranted or is not reasonable, with an explanation thereof.

Please be aware that Section 933.05 specifies that no officer, agency, department or governing body of a public agency shall disclose any contents of the report prior to its public release. Please ensure that your response to the above noted Grand Jury report includes the mandated items. We will expect your response, using the form described by the quoted Government Code, no later than **August 31, 2016**.

Please send a copy of your response in hard copy to the Grand Jury, as well as a copy by e-mail in Word to epant@contracosta.courts.ca.gov.

Please confirm receipt by responding via e-mail to epant@contracosta.courts.ca.gov.

Sincerely,

Michael Simmons, Foreperson

Contra Costa County Grand Jury Report 1606

Reclaiming our Water

More Complicated than it Might Appear

TO: Contra Costa County Board of Supervisors; City Councils of the Cities of Concord, San Ramon, and Walnut Creek; Boards of Directors for Central Contra Costa Sanitary District, Contra Costa Water District, Dublin San Ramon Services District, and East Bay Municipal Utilities District

SUMMARY

The recent drought has raised public awareness about the idea of using more recycled wastewater for irrigation and industrial purposes. The Grand Jury launched an inquiry into what obstacles were preventing water recycling from occurring on a broader scale.

While the recent El Niño storms provided some respite from the current drought, it is too soon to know if this is the end of this drought cycle or just a short pause to the start of a much longer mega-drought.¹ In either event, recycled and recovered water are key factors in achieving sustainable solutions to the water problems within Contra Costa County (County).

More can be done to maximize the use of recycled and reclaimed water in the County, but the infrastructure is not in place and any increase in supply must be carefully balanced with customer demand. Other obstacles in pursuing such a plan include: infrastructure cost, quality of the recycled water, identifying willing customers, facilitating water and wastewater utility cooperation, and potential legal challenges under California's Proposition 218.² Another challenge lies in the comparative cost of

¹ *The West Without Water* – B. Lynn Ingram and Frances Malamud-Roam (2013) and studies done for Contra Costa Water District note that tree ring and other historic evidence (such as changes in Delta salinity levels) suggest California experienced several hundred-year-long droughts in the past 1000 years.

² (<http://www.californiataxdata.com/pdf/proposition218.pdf>)

desalinization plants. In Southern California brackish water desalination costs around \$1600/acre-foot, and sea water desalination costs around \$2400/acre-foot. By comparison, Central Valley Project water, which is used in this County, costs around \$600/acre-foot at the point it is delivered to the treatment plant.

We learned that little is being done to increase capture of stormwater for reuse. Additionally, opportunities exist for supplying recycled water to industrial users, and “wheeling” the previously supplied fresh water to other customers in the County.

This report makes recommendations that address these findings. They include:

- Facilitating (possibly through a Task Force) the formation of a Joint Powers Authority (JPA) to: (i) integrate efforts to use recycled wastewater, (ii) capture stormwater, and (iii) revisit desalination options to supplement the County’s water needs
- Promoting siting of desalination demonstration plants by making unused or under-used County land available for lease
- Promoting public awareness, education and involvement by forming a Water Reuse Advisory Council that includes citizen stakeholders and technology experts to advise the Board of Supervisors
- Adopting ordinances that promulgate recycling and recovery of water on a county-wide basis, with appropriate rules for planned communities and large commercial buildings
- Emphasizing capture and reuse of stormwater where possible in all new County flood control projects
- Promoting on-site capture and reuse of stormwater wherever practical
- Facilitating the use of satellite wastewater treatment plants, where appropriate

Los Vaqueros Reservoir (CCWD)

GLOSSARY OF TERMS AND ACRONYMS

Acre-feet per year (afy)—1 acre-foot = 325,851 gallons or 1233.5 cubic meters
Million gallons per day (mgd)—1 million gallons per day = 1121 afy
Brackish Water— saline water with TDS between 1,000 to 10,000 parts per million
California Department of Water Resources (DWR)
Central Valley Project— irrigation project managed by U.S. Bureau of Reclamation
Clean Water Act— federal law governing pollution of surface water
Desalination— removal of salts and dissolved solids from saltwater (brackish or sea)
Direct Potable Reuse (DPR)—wastewater cleaned sufficiently for direct reuse
Humidification Dehumidification (HDH)—alternative desalination technology
Indirect Potable Reuse (IPR)—term for wastewater cleaned sufficiently for indirect reuse
Integrated Regional Water Management Plan (IRWMP)
Joint Powers Authority (JPA)—two or more government agencies that have agreed to work together on projects of common interest
Local Agency Formation Commission (LAFCO)—its charter is to encourage orderly and efficient provision of services, including water, sewer and flood control
Megawatt-hour (MWh)—a unit of electrical consumption or usage
National Pollutant Discharge Elimination System (NPDES)
Reverse Osmosis (RO)—membrane separation desalination technique
Potable Water—water safe enough to drink and cook with, i.e., free from harmful pathogens and contaminants
Solar Desalination (SD)—alternative desalination technology using heat and/or photovoltaic energy from the sun
State Water Project (SWP)—irrigation project managed by State of California
Tertiary Treatment—advanced treatment (following secondary treatment) that produces higher quality water with essentially all suspended matter removed, and (usually) some reduction in nutrient content
Title 22 Recycled Water—treated wastewater suitable for industrial or agricultural reuse, but not potable quality
Total Dissolved Solids (TDS)—dissolved salt or mineral constituents in water
Wheeling—allowing someone else's water to be moved (either notionally or actually) through your transmission system into the users system; usually for a fee

BACKGROUND

But for the drought, much less attention would have been paid to California's Water Action Plan (known as the 20x2020 Plan). This plan calls for a permanent 20 percent reduction in water use. The Plan uses 2005 as its base year, and will "consider recycling as a means to achieve [the reduction]." It emphasizes that "it is essential for California to expand the use of recycled water." The published plans for both Contra Costa Water District (CCWD) and East Bay Municipal Utilities District (EBMUD) also propose increases in water recycling.

As the drought continued through the summer and fall of 2015, news accounts brought the public's attention to the potential for treating more wastewater to the "tertiary level" and recycling (redirecting) it for industrial and irrigation needs. Some wastewater districts serving Contra Costa are already providing recycled wastewater to industrial, commercial, and municipal users, but further use of this resource is being slowed by a combination of financial and anticipated legal obstacles.

This inquiry focuses on opportunities for expanding water recycling and recovery of our existing local water resources. It also explores how obstacles to these goals may be overcome.

As a drought or regional water shortage progresses, there is a hierarchy of choices to be made. These include:

1. *Conservation* – It is the easiest and least costly to quickly implement.
2. *Recycling of wastewater* – It is the next least costly and disruptive. Wastewater is close to the users' service area, but requires further treatment to make it useable and a distribution infrastructure to deliver it to customers.
3. *Stormwater* – It is only intermittently available but infrastructure must also exist for its capture, storage, and distribution. The reliability and practicality of this resource is both site and climate specific. It was, however, an integral factor in helping Australia through its 10 year-long drought.
4. *Desalination* – It is usually the most expensive, environmentally disruptive, and energy intensive.

In the most severe situations, all four approaches are required.

What the Experts Are Saying –

At the January 2016 Water 2.0 Conference in Sacramento, John Laird, State Secretary of Natural Resources, made some pointed observations:

- California's population is expected to grow by 25 percent over the next generation thus increasing the demand for water.
- Our water infrastructure was designed for a climate that no longer exists.

- We need to build an infrastructure that will match the new climate reality.
- Water conservation works only if you have a reliable underlying water supply.
- While the public wants to believe that if you invest more you will get more of what you invest in (water), the reality may be that you are only protecting the limited supply you currently have (or possibly even less than you currently have).
- Given the facts above, the public needs to be kept informed so that they understand the reality and are on-board when decisions are made.

At the same conference, Felicia Marcus, the Chair of the State Water Resources Control Board, commented that:

- Low interest (1 percent) state revolving-fund loans are available for recycled water and stormwater projects.
- Recycling and stormwater capture projects are also eligible for Proposition 1 matching dollars.
- The Water Board's internal priorities are: permit streamlining (to speed the approval process for new projects), groundwater recharge regulations, and indirect potable reuse regulations.

These comments suggest that the State's regulators are reacting to both long-term and short-term water supply issues by encouraging local entities to take action. However, responsible local entities may not yet be ready to take these suggested steps.

History of Water Reuse–

In some areas of the country wastewater is already being purified and disinfected up to potable quality for reuse.³ The California Department of Water Resources (DWR) is currently drafting state-wide rules under which tertiary treated recycled water can be further purified before reintroduction (either indirectly or directly) into potable water systems. Definitive rules for "potable reuse" in California must be issued by the end of 2016.

California was once at the forefront of water recycling. In 1962, the Montebello Forebay Groundwater Recharge Project, a groundwater recharge project using recycled water, was inaugurated in Los Angeles County. More recently the Chino Desalter Authority came on line. That project, using collected stormwater to recharge the aquifer, extracts groundwater that was previously contaminated with nitrates, purifies it using Reverse

³ *Wichita Falls and El Paso (TX) are both involved in Direct Potable Reuse (DPR) projects.*

Osmosis (RO) technology, and sells the potable product to retail customers in nearby communities.

According to Laura Martin of *wateronline.com*, California has more groundwater recharge Indirect Potable Reuse (IPR) projects than any other state. The DWR has reviewed and approved each of these projects. Locally there are two RO plants in Alameda County and one in Santa Clara County that treat groundwater to potable quality. In 2008-2009, several Bay Area water districts cooperated in an experimental RO Plant at Mallard Slough to verify costs and feasibility of desalinating brackish river water. The plant demonstrated its feasibility but was later removed because it was not economically viable. Although the calculated cost of the potable water was roughly \$1000/acre-foot, it could not compete with \$600/acre-foot Central Valley Project water.

Twenty years ago, EBMUD and Dublin San Ramon Services District (DSRSD) formed a Joint Powers Authority (JPA) to distribute recycled water to supplement the water supply during the dry summer months. The partnership built a tertiary treatment plant and a "trunk line" to distribute the recycled water. DSRSD personnel operate the plant, and together with EBMUD share in the JPA's operating expenses. They distribute the recycled water primarily to commercial water customers who use the recycled water for irrigation (in lieu of less available potable water). Both EBMUD and DSRSD benefit through this partnership: DSRSD reduces the amount of wastewater it would otherwise have to pump into the San Francisco Bay, and EBMUD benefits from not having to supply more valuable drinking water for irrigation purposes.

DISCUSSION

Water Recyclers and Existing Customers –

Statewide, urban water agencies currently recycle about a third of potentially recyclable water – 300,000 acre-feet per year (afy) of 900,000 afy. In Contra Costa County, seven wastewater treatment plants are producing recyclable water (Title 22 quality) suitable for use outside their plants for industrial and irrigation purposes. The majority of this water is supplied to two power plants in Pittsburg and an oil refinery in Richmond. Golf courses, public parks, public school landscaping, and median strips use almost all of the balance. Dust suppression at concrete batch plants and public filling stations also use the remaining small fraction. Table 1 summarizes the suppliers and the recycled amounts. Currently, almost 25 percent of wastewater is recycled during the peak summer months. This is slightly lower than the state-wide average; however, all this water is non-potable quality – thus is underutilized during winter months, when it is not needed for irrigation.

Table 1 – Suppliers and Users of Recycled Water in Contra Costa County
(Most to least)

Treatment Plant	Effluent Treated, (Average Dry Weather Flow), mgd	Outside Plant Use, mgd	Comments Million Gallons per Day = mgd
Central San (CCCSD)	30	2.9 (available) 0.6 (used)	0.6 mgd committed to Zones 1 & 2 plus Fill Station
Delta Diablo	12.8	7.3	During hottest summer days 100% to Calpine, purple pipe irrigation, and public "Fill Station"
West County SD	6.5	5.8	Essentially 100% of capacity is spoken for by Chevron
City of Richmond	6.03	0	Discharged to the Bay; effluent is too salty for recycling
Pinole/Hercules	3.5	0	Discharged to Bay
City of Brentwood	3.2	0.5	Purple pipe to golf courses and parks; also "Fill Station"
Ironhouse SD	2.26	1.0	Ag application; the rest goes into river
Discovery Bay CSD	1.8	0.6	Local irrigation
Dublin San Ramon SD	1.6 (from Contra Costa)	1.5 (returned to Contra Costa)	Purple pipe to golf courses and parks; also "Fill Stations"
Mt. View SD	1.25	0	100% is being fed into a marsh for wildlife habitat
Rodeo SD	1.14	0.01	Minor amount for in-plant landscape
Crockett CSD	0.93	0	Discharged to Bay
Byron SD	0.1	0	Discharged to Marsh Creek
TOTALS	71.11	17.31	Average = 24.3%*

* This is the annual average. The percent recycled increases in hot summer months and decreases in winter months.

Potential Recyclers and Potential Customers –

There are 13 wastewater treatment plants serving the County. Also, there are several industrial sites that treat and then discharge their internally generated wastewater

directly into the Delta or the Bay. If some of this discharged water was further treated, it could be reused at the industrial sites instead of discharged. This would lower these sites' demand for higher quality outside water. However, it is unclear if this plan is currently economically viable.

Central Contra Costa Sanitary District (CCCSD) has the greatest potential capacity to recycle water. Even so, its ability to process Title 22 quality water for export is currently limited to roughly 3 mgd. To increase its capacity CCCSD would need to construct additional filtration units and related infrastructure. Industrial customers (Shell Martinez, and Tesoro Golden Eagle refineries) would be potential users of any such recycled water. Apart from industrial users, CCCSD is expanding its system for distributing recycled water to local golf courses. Table 2 summarizes the players, potential quantities available for reuse, and the potential needs. There are other smaller projects that would use on-site or satellite treatment plants to "harvest" a portion of the wastewater stream for golf course irrigation, before sending the balance on to the main treatment plant. Cost would be borne by the user.

Table 2 – Potential or Planned Recycled Water Projects

Treatment Plant	Customer/Project	Quantity Required, mgd	Timeline and/or Comments
CCCSD	Shell Martinez (cooling, process and boiler make-up water)	10	2020 and beyond – insufficient treatment capacity currently exists to supply full demand
CCCSD	Tesoro Avon (cooling, process and boiler make-up water)	10	2020 and beyond – insufficient treatment capacity currently exists to supply full demand
CCCSD	Concord Naval Weapons Station Redevelopment (residential and commercial)	2.5	2020 and beyond – treatment capacity currently exists to supply full demand
EBMUD (partner/w Pinole and/or Rodeo SD)	Phillips 66 Rodeo	2.8 (Phase 1) 0.9 (Phase 2)	Purchase agreement would have to be negotiated and a dedicated treatment plant built.
DSRSD-EBMUD	San Ramon Valley, Phase 2	0.43	Expansion of system to Bishop Ranch – 2017

The County is below the statewide average of 33 percent recycled water use. To reach "average", customers in the County must use an additional 6.2 mgd of recycled water. (The County's 2005-2020 General Plan includes a policy to "encourage the construction

of wastewater disposal systems designed to reclaim and re-use treated wastewater...”). DSRSD and EBMUD will start construction in 2017 on Phase 2 of the San Ramon Valley Recycled Water Project, which will add 3.6 miles of recycled water pipeline to connect Bishop Ranch Business Park to the distribution system. However, the project is only expected to add 0.43 mgd of recycled water usage.

The Water Suppliers –

EBMUD has two dams on the Mokelumne River plus several local reservoirs in the County. It also has an option to buy water from Yolo County during drought years and an intake structure (Freeport) on the Sacramento River to route that water to its existing aqueducts. Additionally, EBMUD is studying “groundwater banking” with San Joaquin County water authorities. This involves intentionally flooding farm land during the winter months to increase percolation into the aquifer for later use. EBMUD plans to increase its use of recycled water by 20 mgd over the next 25 years.

CCWD has rights to use up to 195,000 afy of Central Valley Project (CVP) water.

The “rights” are administered by the U.S. Bureau of Reclamation and can be reduced or curtailed in drought years. In addition, CCWD has a drought year agreement with East Contra Costa Irrigation District (ECCID) to option its 1914 senior surface water rights. It also has Los Vaqueros Reservoir (current capacity 160,000 acre-feet) to help buffer the impact of multiyear droughts. CCWD recently completed a “wheeling” agreement with EBMUD, which allows it to take its CVP water at the Freeport intake structure when capacity is available, rather than from its existing facilities on the San Joaquin River.

CCWD’s 10 Year Capital Improvement Plan mentions recycling, but lacks details about specific projects. The page in the Plan that mentions recycling states that any recycling project will *be equally funded by grants and untreated water rates*. Approximately ten percent of CCWD’s current water demands are met with recycled water supplied by others under various Memoranda of Understanding. CCWD plays no direct role in supplying the recycled water to customers.

DSRSD gets its water from Alameda County Zone 7 Water District. The wholesale price of \$1300/acre-foot is passed directly through to DSRSD’s customers as part of the total water bill. It also treats wastewater to Title 22 quality and distributes it via its recycled water pipeline to larger users. DSRSD is entirely dependent on Zone 7 for its fresh water supply, and Zone 7 is heavily reliant on the State Water Project (Lake Oroville) for its water.

The remaining water purveyors in the County rely on water from CCWD in whole or in part or rely exclusively on groundwater wells to meet their customers’ needs. The major water suppliers in the greater Bay Area are becoming more connected through the use of inter-ties and agreements to wheel water to meet emergency situations or when conveyance capacity is available.

Where the County Government Fits in –

The County's General Plan contains a broad principle (under section 8-di) that encourages that wastewater disposal systems be designed to reclaim and reuse treated wastewater. Beyond that, there is no explanation in the Plan on the actions the County will take.

The County interfaces with the various water and wastewater districts through the Board of Supervisors' Transportation, Water and Infrastructure Committee (TWIC). Contra Costa LAFCO, an independent agency with countywide jurisdiction, also interacts with these districts. Both receive periodic reports from the districts on their plans and activities. LAFCO has the additional responsibility of managing boundary issues and periodically assessing the financial stability of each district. The County and LAFCO have not assigned personnel to act as a watchdog or play a facilitator role in the areas of recycled or reused water.

Obstacles to Overcome for Recycled Water Projects –

Before any recycled water project can be implemented, issues related to cost, operations, water quality, customer base, regulatory and legal compliance, financing and timing must be addressed. Additional obstacles are the need to obtain consent from the water supplier and the perception on the part of the water suppliers that their water rights and allocations might be impaired.

Projects Worth Pursuing –

RMC Water and Environment recently completed a recycled water study for CCCSD.⁴ Among other options, the study considered adding 20 mgd tertiary treatment and ammonia removal capacity. Under this option, a 42-inch diameter pipeline would connect the Shell and Tesoro oil refineries to supply cleaned wastewater for cooling towers and for refinery process water. As a result, an equivalent quantity of CCWD fresh water would be "freed up" for other uses. The estimated cost to add capacity and treat the recycled water is \$820/acre-foot (\pm 30%). While this figure is higher than the \$650/acre-foot CCWD currently charges wholesale customers for raw canal water, it is anticipated that some customers would be willing to pay more for a secure supply.

With the expansion of its Los Vaqueros Reservoir, CCWD will be able to "bank" some of the newly available water and offer it to other regional water districts, like DSRSD. DSRSD and their water supplier, Alameda County Zone 7, both need additional water to support a growing customer base. After the expansion is completed, CCWD could potentially wheel the water via the proposed Transfer-Bethany-Pipeline to the South Bay Aqueduct, which connects to Alameda Zone 7's system. The responsible parties would need to negotiate the terms of such a project, including its financing, the water

⁴ CCCSD's *RECYCLED WATER WHOLESAL OPPORTUNITIES* – March 2016 – prepared by RMC Water and Environment

recipients, the price per acre-foot, and operation and ownership of the equipment and infrastructure. One mechanism to move such a project forward would be for the parties to enter into a JPA.

Other potential projects are small scale IPR projects. For example, DSRSD is studying injection and recovery wells as a means of fully utilizing its current recycled water capacity. CCCSD also has a capacity surplus of Title 22 quality water. That water could be treated to IPR quality and used for an injection and recovery well demonstration project with CCWD.

Stormwater Capture and Reuse –

The National Resources Defense Council (NRDC) recently graded California “D” in stormwater capture and reuse. Southern California, however, is aiming to increase its efforts in this area, with an ultimate goal of meeting at least ten percent of its total water needs from this source. According to the NRDC “capturing urban stormwater runoff in Southern California and the SF Bay Area could increase the water supply by as much as 630,000 afy while reducing a leading cause of surface water pollution.” The City and County of San Francisco is also actively addressing capture and reuse of urban runoff. They recently passed ordinances mandating that new commercial buildings over a certain size must recover both gray water and stormwater for reuse on premises. This approach is most likely to yield significant benefits in high-density urban areas.

The Public Policy Institute of California lobbied for reforms to State Propositions 218, 26, and 13 to exempt water-related projects from the two-thirds majority vote requirement for new assessments, fees, charges or special taxes. The court in *Griffith v. Pajaro Valley* (2013) found that fees charged by water agencies, including flood control districts, for projects related to water or sewer services are exempt from the two-thirds majority voting requirement under Proposition 218. Thus, fees can be assessed for projects relating to capture and reuse without a two-thirds majority vote. As this remains a contentious issue, flood control districts are reluctant to go forward with capture and reuse projects until case law has been further established.

The Watershed Atlas of Contra Costa identifies 16 specific watersheds comprising roughly 513,280 acres. Assuming that future rainfall only averages 12 inches per year and that half of that rainfall soaks into the exposed soil, the remaining runoff still adds up to over 250,000 afy of locally available water. If only half of the runoff was captured, it would exceed the amount currently supplied by CCWD to its 500,000 customers. However, projects to maximize stormwater capture have not yet been identified in the County.

Australia is a leader in implementing innovative systems for stormwater capture. Two schematics for surface stormwater capture and underground storage systems are shown:

Underground Storage Scheme (NSW Dept. of Environ. & Conservation-2006)

Surface Swale Scheme (NSW Dept. of Environ. & Conservation-2006)

Various "water-advocates" agree that regional self-reliance and multi-benefit solutions are keys in achieving a sustainable, reliable water infrastructure. The focus on stormwater management by the County and its nineteen cities relates almost exclusively to compliance with NPDES stormwater discharge permits. These municipalities do not have plans for capturing stormwater for beneficial use, except to the extent that it promotes retention of pollutants that might otherwise be released into the San Francisco Bay or Delta.

The storage capacities of groundwater basins in the County have not yet been quantified. Even if significant (tens of thousands of acre-feet) storage capacity were identified, well drilling data collected by US Geological Service and California DWR suggest that augmented recharging could be difficult. Contra Costa's basins have layers of impermeable and low permeability clays that slow percolation, thus natural percolation from the surface is limited in many areas. Additionally, geological faults impede the flow of groundwater from one area to another.

Desalination Options –

The most prevalent technology for desalination, Reverse Osmosis (RO), involves forcing water molecules through filtering membranes at high pressure to remove salts

and other impurities. Sea water systems require 2 cycles (stages) to produce fresh water. Brackish water requires only one cycle to produce fresh water and, thus, is a less expensive source than sea water. The process is slightly more efficient when the inlet water is warmer.

A large sea water desalination plant was just completed in Carlsbad, CA, which is producing fresh water for approximately \$2200 to \$2400/acre-foot. Recent RMC estimates for producing DPR quality water from wastewater supplied by CCCSD ranged from \$2200 to \$2300/acre-foot, a cost that is on a par with sea water desalination, but higher than brackish water desalination. This suggests that in certain scenarios brackish water desalination might be a less costly option than recycling wastewater up to potable quality.

Bank of Desalination Membrane Filtering Tubes

RO is considered to be a “mature” technology, meaning it is unlikely that there will be breakthroughs in the near future that will drive either construction or operating costs down. According to the California Energy Commission in 1980 it took 36 MWh of electricity to produce one acre-foot of desalinated water. Currently only 3.5 MWh is needed – which is roughly fifty percent energy efficiency – extremely good for an industrial process. By comparison, almost the same amount of energy is needed to import an equal quantity of surface water to Los Angeles and San Diego from the Colorado River.

At least two emerging technologies may place less demand on the electric grid in the future: solar desalination (SD) and humidification dehumidification (HDH) desalination. The former uses solar concentrators and panels to produce fresh water and salt cake

from brackish water. The latter is designed to use waste-heat (hot air) to promote evaporation on one side of a heat transfer surface and condensation of fresh water on the other. "Dewvaporization" is one variation of the HDH process. It uses a common heat transfer surface and is theoretically even more energy efficient. Although pilot plants have been tested with both methods, thus far there is little interest in taking the next step to an industrial scale operation. Appendix 2 contains a discussion of other desalination options.

The U.S. Bureau of Reclamation funded an HDH pilot plant. One of the goals for the project was to "develop methods to make desalting more efficient through promotion of dual-use facilities in which waste energy could be applied to desalting water." The 5,000 gallons/day pilot plant is located at a wastewater treatment plant near Phoenix, Arizona. The HDH process uses low-grade heat and waste heat to promote evaporation of the wastewater stream. A similar plant could be built at CCCSD. It uses natural gas from the adjacent landfill as fuel for drying its treated solid waste; thus, waste heat should be available for an HDH desalination plant.

Regardless which technology is selected, water professionals believe that desalination plants will ultimately be part of the water reliability solution. In addition to treating water from the San Francisco Bay and the Delta, they also can upgrade groundwater that contains a high level of total dissolved solids (TDS). Such water is currently blended with higher quality surface water, limiting the amount that can be used.

The California Legislature is considering allowing "surplus" solar power to be used for desalination projects at below market price. This would make such projects an even more attractive alternative.

The Cost of Doing Nothing –

If nothing is done, the result may be higher rates for less water. While some environmentalists view this as a "least worst" outcome that will rein-in wasteful practices and minimize environmental impacts, there are disadvantages:

- It adversely affects lifestyle choices, such as: outdoor pools, home gardens and orchards, and landscaping
- It discourages new industries that need water to operate their businesses from locating here
- It leaves the County's residents at the mercy of the weather and reliant on stored water reserves

If water conservation is the only approach used, customers could end up paying almost as much each billing cycle while using less water. On the other hand, if the water shortage is approached using a combination of water conservation and water treatment, customers may ultimately pay less than water conservation alone. This is because a

water supplier can increase its profitability by providing treated water to its customers. Increasing the amount of water delivered generally does not increase a water supplier's fixed costs and can help to cover those costs. The fixed costs come from debt financing of infrastructure that must be paid off (such as the Los Vaqueros Reservoir and the Freeport Intake on the Sacramento River), employee salaries, and maintenance costs on equipment that must be kept in operation regardless of the amount of water passing through.

The bar chart (Table 3) illustrates conservation's unavoidable consequence: the first few gallons of water used become more expensive as total consumption decreases. This may seem counter-intuitive, given that the unit rates incorporated on tiered-rate water bills show progressively higher unit costs when the "life-line" quantity is exceeded. However, the reality is the fixed "service charge" is added on top of whatever amount of water is used.

Table 3 – Unit Cost Bar Chart

Vertical-axis = dollars/unit (748 gallons) based on a 61 day billing cycle
Horizontal-axis = average gallons per day over 61 day billing cycle

Water providers recently pointed out that water conservation has resulted in "drastic losses in revenue needed for infrastructure investments and fixed cost recovery (costs incurred regardless of amount of water used – representing about 70 percent of customer bills)." A recent Fitch Ratings survey revealed that 78 percent of municipal water agencies have already, or plan to, adjust rates to offset losses from mandatory conservation. Clearly the downside of conservation is that the retail customer will not be saving much money for using less water.

Final Observations –

- Water supplies are not growing, but population is.
- Desalination of brackish water (where available) needs to be revisited. Estimated costs are slightly lower than DPR quality water and public acceptance could be easier to gain.
- The estimated costs for IPR and DPR remain relatively high, even though the energy cost to operate the plants should be lower than desalination plants.
- Unless CCCSD can get a State or Federal grant to increase its capacity for recycled water, it cannot be cost competitive with raw canal water supplied by CCWD to their industrial customers.
- State matching grant money and low-interest loans are available for recycled water and desalination projects.
- Recycling Title 22-quality water to year-around customers has a better chance to maximize its use, provided willing customers can be signed up.
- Both mandated conservation and recycling water potentially reduce water purveyors' revenue resulting in upward pressure on billing rates.
- Stormwater should be part of the water sustainability solution – even though its expected contribution will be limited.
- The Board of Supervisors could (through a Task Force) be an effective facilitator in the formation of a recycled water JPA.
- The Board of Supervisors could (through an Advisory Council) be an effective facilitator in educating and encouraging the participation of the public.

FINDINGS

- F1. Among obstacles to using more recycled water are: determining who will pay for installing the necessary infrastructure and distribution system; finding a willing customer; and minimizing the financial and legal impacts to the current potable water purveyor.
- F2. Water purveyors and wastewater processors can share water treatment costs and revenues under a JPA.
- F3. State matching grants and low-interest loans are available for small indirect potable reuse projects, which could potentially increase water supply.
- F4. Indirect potable reuse projects are ideal for areas in the County where other new water sources are unavailable.
- F5. It is difficult to develop large recycled water projects without the cooperation and commitment of water purveyors and customers.
- F6. Where recycled water can be wheeled to one customer, it could “free up” an equivalent amount of fresh water that could then be wheeled to another customer who might be willing to pay more, thus creating “win-win” results for recycled water projects.
- F7. While stormwater capture and reuse has potential for contributing to the County’s long-term water needs, the County has focused on NPDES compliance.
- F8. Contra Costa County and its cities could adopt water saving and recycling ordinances for large commercial buildings, similar to those adopted in other large urban locations such as San Francisco.
- F9. Satellite wastewater treatment plants are feasible in situations where the user is distant from existing recycled water distribution systems, needs water for irrigation, and is able to meet the costs to build and operate the plant.
- F10. The County is below the State average in use of recycled water.
- F11. Desalination technology continues to evolve, including smaller scale solar powered and HDH (“Dewvaporation”) pilot plants, although neither has been developed to full commercialization.
- F12. Citizen involvement (possibly through an Advisory Council) is a key to getting buy-in for recycle and IPR/DPR projects because it is citizens who pay for, consume, and depend on a reliable source of pure water.
- F13. There is no single point of contact for water recycle and reuse issues in the County.

RECOMMENDATIONS

- R1. The Board of Supervisors should consider facilitating (possibly through a Task Force) the formation of a JPA to promote water recycling, stormwater capture and desalination projects.
- R2. CCCSD and CCWD should explore the feasibility of cooperatively developing an IPR Injection Well Project.
- R3. CCCSD, CCWD, and DSRSD should consider the formation of a JPA to expand CCCSD's tertiary treatment capacity in order to free up fresh water for domestic and commercial customers.
- R4. The Board of Supervisors should consider directing that priority be given to capture and reuse of stormwater where possible in all new County flood control projects.
- R5. The Board of Supervisors should consider adopting ordinances that promulgate recycling and recovery of water on a County-wide basis.
- R6. The city should consider adopting requirements relating to the use of reclaimed water for planned communities and large commercial buildings to maximize its use.
- R7. The district should consider facilitating the use of satellite wastewater treatment plants, where appropriate.
- R8. The Board of Supervisors should consider adopting a County goal to exceed the State average for recycled water use and establish a target date.
- R9. The County and Districts should consider meeting to discuss each District's need for land for demonstration of scaled-up recycling and desalination projects using green technologies, which may qualify for State grant money, and the County's ability to lease such land.
- R10. To promote public awareness and citizen involvement, the Board of Supervisors should consider establishing a citizen's "Water Reuse Advisory Council" which includes citizen stakeholders and technology experts to advise them on all water reuse issues affecting the County.
- R11. The Board of Supervisors should consider designating a single point of contact within County government for water recycle/reuse issues or establishing a permanent water sustainability subcommittee under their Transportation, Water and Infrastructure Committee to advise the committee on water reuse issues.

Civil Grand Jury – Foreperson

725 Court Street

P.O. Box 431

Martinez, CA 94553-0091

APPENDIX 1

METHODOLOGY

The Grand Jury surveyed a cross-section of wastewater treatment agencies; attended various public meetings at agencies, special districts, and boards; and conducted sixteen interviews with managers, technical specialists, and water industry consultants from:

Cities that treat their own water and/or wastewater
Contra Costa Central Sanitary District (CCCSD)
Contra Costa Clean Water Program (CCCWP)
Contra Costa Water District (CCWD)
County Departments with responsibility for water-related issues
Delta Diablo (DD) – formerly Delta Diablo Sanitary District
Diablo Water District (DWD)
Dublin San Ramon Services District (DSRSD)
East Bay Municipal Utilities District (EBMUD)
East Bay Leadership Conference – Water Task Force
East Contra Costa County Integrated Regional Water Management (Plan)
East County Water Management Association (ECWMA)
Local Agency Formation Commission (LAFCO)
San Francisco Bay Regional Water Quality Control Board (SFBRWQCB)

APPENDIX 2

OTHER DESALINATION OPTIONS–

The information below expands on some other technologies available for desalination. Electrodialysis and Forward Osmosis were not previously discussed in the report.

Electrodialysis (ED)–

ED is an ion exchange membrane process that uses electrical potential as a driving force to remove salts from brackish or sea water. Reportedly the process operates most efficiently with brackish water containing less than 3,000 TDS. This technology may be best suited to smaller projects. According to Lee and Moon (in *Desalination – Water from Water*), a 10,000 cubic meter capacity plant could produce desalinated water for \$0.83/m³ or about \$1024/acre-foot. However, brine disposal costs would have to be added.

Forward Osmosis (FO)–

FO is an osmotic process similar to reverse osmosis, but instead of a pressure gradient, it uses a higher concentration “draw” solution as the driving force to move water across a semi-permeable membrane. This produces a less concentrated solution on the draw side of the membrane from which the water must then be extracted. A pilot or demonstration plant was built by NASA Ames Research Laboratory recently. According to McCutcheon and Bui, (in *Desalination – Water from Water*), “FO promises to enable low cost desalination with improved recovery and fouling resistance...” For wastewater treatment it could be “hybridized” with existing RO units. In this scenario it would act as a pre-filter to skim out the water from an otherwise unprocessed waste stream.
